**Aims and Objectives**

The London internship is an academic course. In addition to performing a role in a British organisation related to the London theatre scene, students must meet a number of academic requirements so as to successfully complete the internship. During the internship, students have to attend three mandatory tutorial meetings and produce academic work which will account for all of their final grade.

The objective will be to relate the experience of the internship to the Core Class CFA DR443 Experiencing London Theatre: in the Postwar World. In other words, to show knowledge of the overall picture of contemporary British theatre in London; to understand a broad range of the major developments in British drama over the past 60 years; to relate drama to broad changes in British society; to examine the work of specific writers and directors in detail; to stimulate critical analysis through written work and discussion; to understand the role of the Arts Council and state subsidy of the performing arts. The ultimate aim is to demonstrate an awareness of British theatre, and an insight into how it is organised and why it has developed in its present form.
