

## DUBLIN, IRELAND > STUDY ABROAD

The Dublin Internship Program offers a semester of study and work in one of Europe’s most vibrant and cosmopolitan cities. Based at Dublin City University (DCU), the program combines a professional internship with coursework on various aspects of Ireland’s dynamic history and contemporary culture, including its art, economy, literature, media, and politics. Courses designed specifically for the program are taught by faculty drawn from Dublin-area universities and professional institutes.

In the fall, the program includes a track in health sciences, ideal for students interested in pre-med, public health, PT/OT and nursing. Students in this track will enroll in Ethics in Health Care during the core phase, and then participate in an internship in the field of health sciences.

Upon successful completion of the program, students earn 16 Boston University credits.
