

MAIZE AND GRACE

Africa's Encounter with a New World Crop, 1500–2000

James C. McCann

James C. McCann is
Professor of History and
Associate Director of the
African Studies Center at
Boston University.

2006 GEORGE PERKINS MARSH PRIZE, AMERICAN SOCIETY
FOR ENVIRONMENTAL HISTORY

HONORABLE MENTION 2006 MELVILLE J. HERSKOVITS
AWARD, AFRICAN STUDIES ASSOCIATION

"Maize and Grace shows how a New World crop contributed to the emergence of modern-day Africa. Some parts of Africa now have higher maize consumption per capita than Mexico and Guatemala, where the crop originated... Rather than describing sweeping historical currents, the book offers the reader a series of vignettes that provide opportunities to appreciate the paradoxes of maize development policy and to contemplate some enduring themes in agricultural history."

—Robert Tripp, NATURE

"McCann celebrates the ingenuity of African farmers as they adapted the crop to local customs and climactic conditions, but he argues that the policy world has

largely ignored the socioeconomic and environmental implications of the emergence of maize as a staple. In the book's most fascinating chapter, he convincingly links a major malaria epidemic in the highlands of Ethiopia in 1998 to the widespread adoption of maize in the area over the preceding decade."

—Nicholas Van De Walle, FOREIGN AFFAIRS
