

**The Boston University
Infant Language Laboratory is seeking infants
raised in a Mandarin Chinese-English bilingual
home to participate in a research study**

Do you have a 5-8-month-old infant?

- **Do you speak Mandarin and English to your infant?**
 - **Your baby can help advance research in language development at Boston University by participating in our research study!**

Details about the study:

- **The study takes about 30 minutes and involves listening to speech in Mandarin and English**
- **We measure how long babies listen to speech in each language**
- **You will be with your baby for the entire time.**
- **Our lab is easily accessible by subway or car and we provide a free parking pass to the laboratory.**
- **Each family will receive \$20 and a small gift.**
