The Boston University Center for Philosophy & History of Science was founded in 1960 as an interdepartmental, inter-university forum on the nature of science. For over 50 years the Colloquium has fostered the Center's goal of building interdisciplinarily by bringing together the world-leading leaders in the philosophy, history, and social studies of science in an annual lecture series.

All lectures are free and open to the public. Selected proceedings of the colloquium are published by Springer in the series Boston Studies in the Philosophy of Science.
