

Senior Software developer

We are looking to hire a knowledgeable, proficient, self-motivated, and highly disciplined senior software developer to assist us in developing the next version of our flagship products in ASP.NET technologies.

You will be working in a quiet work environment with a small team of highly dedicated professionals. This position provides a great opportunity for self-development and learning.

Skills required:

- Deep knowledge of ASP.NET, C#, JavaScript, and HTML.
- High proficiency in object oriented programming concepts.

You will work from a private windowed personal office with a state of the art workstation and development tools. We offer a competitive salary and a generous benefit package.

Benefits include a comprehensive health insurance plan with no employee contribution, a retirement plan with 3% employer matching contribution, long term disability, 3 weeks of vacation, and 10 holidays.

- **Local candidates only**
- **US Citizens and Permanent residents only**
