

TECH TALK

INDUSTRY UPDATES, JOB & INTERNSHIP OPPORTUNITIES FROM LOCAL EMPLOYERS

AFL Global

“Enabling the Cloud”

Today, more and more companies are using Cloud computing to provide services and products to their customers. The Cloud offers businesses a more cost effective method of delivering Software (SaaS), Infrastructure (IaaS), and Platforms (PaaS) by using shared resources to allow global and easy access.

The Cloud depends on a system of multitudes of computers interconnected by fiber optic networks. AFL’s Test & Inspection Division provides the equipment necessary to test, validate, and certify these fiber networks. The fiber testing methodologies will be discussed.

Remember to bring copies of your résumé - JOB OPPORTUNITIES WILL BE DISCUSSED.

Thursday, September 18, 2014

5–5:45 p.m.

685-725 Commonwealth Avenue, Room 208, Boston
