Akamai – Faster Forward

On any given day, Akamai delivers more than two trillion Internet interactions – ensuring a fast, reliable and secure online experience for millions of global users. As a leading provider of cloud services designed to help enterprises deliver the best online experience to any device, Akamai delivers a business-ready Internet.

Akamai makes the Internet fast, reliable and secure, optimizing websites and applications from the data center to the edge of the Internet. The Akamai Intelligent Platform delivers secure, high-performing user experiences, ranging from commerce, to enterprise to entertainment. Game-changing companies rely on Akamai to help drive their businesses faster forward.
