

# Boston University Clinical & Translational Science Institute

[www.bu.edu/ctsi](http://www.bu.edu/ctsi)

We support Boston University's basic researchers, patient-oriented researchers, and population-based researchers working in all areas of Translational research related to the prevention, diagnosis, and management of human disease.

Bench Researchers

Patient-Oriented Researchers

Population-Based Researchers

Connecting you to training and education, support for research, and research networking to help achieve your translational research goals

## Training and Education

We engage our Boston University research community to build skills in translational research—building the next generation of researchers by providing:

- Mentored Career Development (KL2 program)
- Clinical Research Training (CREST program)
- Pre and Post-Doctoral Training (TL1 program)
- Seminars & Workshops
- Research Team Training (Consultations, Good Clinical Practice, etc.)

## Research Support

The CTSI offers an array of cross-campus research resources including training, funding, study design, data collection & management, analysis and dissemination.

- Pilot Awards
- Interdisciplinary (ARC's)
- Study Design & Consultations
- IRB Review
- Recruitment & Retention
- Protocol Implementation
- Regulatory Support
- Data Management & Analysis
- Core Lab Support

## Research Networking

Team Science is a critical factor of the CTSI, using resources and expertise to promote the highest quality and most efficient clinical and translational research. We collaborate and innovate with a network of research institutions across the nation.

- Clinical & Translational Science Institutions
- Community Stakeholders
- Academic Institutions
- Industry
- Clinical Research Organizations
- Electronic Tools
