

# Screening Process

In order to ensure the health and safety of the GSDM community, we will be screening all individuals who enter a GSDM facility for COVID-19 symptoms. The screening process was launched in early June and will continue for the foreseeable future.

## Who

All GSDM employees, students, residents, patients, and visitors must go through the screening process. The screenings are conducted by Medix, a third-party company that was vetted by both GSDM and the university's COVID-19 Medical Advisory Group.

## Where

BU Medical Campus: The screening tent is located outside the East Newton Street entrance of 635 Albany Street  
930 Commonwealth Ave.: The screening tent is located on Dummer Street

## What

The screening process consists of two-parts: a short, symptom-based questionnaire, and a temperature check. Individuals who answer "yes" to any question or who have an elevated temperature will not be allowed to enter a GSDM facility to proceed to work or class, and will be referred to the appropriate medical office (Occupational Health for faculty/staff; Student Health Services for students/residents) and encouraged to contact their primary care physicians.

## When

You will have to go through the screening process the first time you enter a GSDM facility each day. Once you clear the screening, you will be given a form of identification (sticker, bracelet, etc.) that will allow you to come and go from that building as necessary.

## How

You can access the screening questionnaire by typing a URL into your phone - [surveymonkey.com/r/BUCOVID](https://surveymonkey.com/r/BUCOVID) - or by scanning the QR code to the left.

**Hot Tip:** Bookmark the survey's URL in your smart phone's web browser, so you can pull up and start to complete the survey on your walk to the screening tent each morning.
