**FAIL □**

FACIAL HAIR □ NON-FIT □

REQUIRE PAPR □ RE-TEST □

---

When the sunlight strikes raindrops in the air, they act like a prism and form a rainbow. The rainbow is a division of white light into many beautiful colors. These take the shape of a long round arch, with its path high above, and its two ends apparently beyond the horizon. There is, according to legend, a boiling pot of gold at one end. People look, but no one ever finds it. When a man looks for something beyond reach, his friends say he is looking for the pot of gold at the end of the rainbow.

I certify that I am participating in a medical surveillance program through or in cooperation with the Boston University Occupational Health Center or Occupational Health and Environmental Medicine at Boston Medical Center. I was trained in the use of respirators and fit tested with the respirator listed above. I have had the opportunity to ask questions and that those questions have been answered to my satisfaction. I also understand that the above fit test is voided if the respirator is worn when conditions prevent a good face seal (i.e. facial hair), or if the respirator is used for purposes for which it is not intended, or if the respirator is used while damaged, wet or otherwise compromised.
