Dr. Julie Keysor Boston University Children’s Arthritis Calendar

I am Dr. Julie Keysor, Director of ENACT, the Center for Enhancing Activity and Participation among Persons with Arthritis.

I love these pictures. These are pictures from the 2011 calendar of the Arthritis Foundation. They asked kids to draw pictures of movement and arthritis. The kids drew pictures about dancing, and swimming, and playing softball and baseball, all the different kinds of things kids with arthritis can do to stay active. And it feels like it’s a good fit for me with ENACT because our motto is active living with arthritis. As the children say, keep moving, keep smiling. Don’t let arthritis stop you from moving.
