

## Belcan

Belcan is an entrepreneurial and market driven organization committed to quality and customer satisfaction. Belcan is among the top 10% of the largest engineering firms in the country with over 6000 employees at 58 locations. The Advanced Engineering and Technology Division (AETD) of Belcan is a global provider of highly technical engineering services to a wide variety of industries.

Our Lynn, MA office is currently looking for a **Senior Engineer / Staff Engineer** with technical strength in mechanical design. Specific areas of expertise include design of gas turbine engine components, compressors, turbines, bearings, gearing systems, external accessories design / configurations.

Candidates need to have 10-15 years of experience in one or more of these areas. A minimum of a Bachelors Degree in Mechanical or Aerospace Engineering is also required. Candidates should have done detailed design from concept through production / hardware procurement and test of his/her design. Candidate also needs to be process and discipline focused, an idea generator, good mentor/ trainer and coach. Experience in technical and program management and understanding of design tools and interpreting the results - heat transfer, stress analysis, vibration is a plus. Good written and verbal communication skills and strong work ethic are also needed

Due to the nature of the work being done applicants must be U. S. Citizens or permanent residents.

These are direct full time positions. We offer a very competitive compensation and benefits program. Please email your resume to [scrich@belcan.com](mailto:scrich@belcan.com)
