

Senior Software Engineer
Somerville, MA (Davis Square Area)

Award-winning energy monitoring company is seeking an experienced Senior Software Engineer to join our team and enhance energy monitoring systems. Our systems monitor every aspect of large turbine powered generation plants including substations, and meteorological towers.

Our organization is the leader in independent supervisory control and data acquisition systems for energy, with an international clientele. Our systems are based on our own equipment and PCs connected by various types of networks, running our software. We interface to everything from simple wind sensors to PLC-based wind turbine controllers, and substation RTUs.

This position is responsible for the architecting, coding, testing, debugging, and deployment of the next generation enterprise level databases and applications for the commercial wind energy industry. Candidates must have a minimum of 5 years of experience in database design and development, application development including distributed enterprise level applications and the following skills:

- MS SQL server 2005/2000
- Stored Procedures, T-SQL, CLR
- .NET 2.0 C#
- ASP.NET, XML, VB
- Integration Services, Reporting Services

Successful candidates will be expected to effectively work independently in an intense, fast-paced environment and ensure that the needs and expectations of each project are met in the established timeframe. We are seeking individuals with effective communications skills, who are self-starters and adaptable. A 4-year degree in computer science or engineering, in addition to five or more years of database design and development, and application development including n-tier distributed enterprise level applications is needed.

Help us meet the challenges of servicing our installed base, meeting our contractual commitments, and staying on top of new technology, all in the rapidly evolving wind power industry.

We offer a flexible work environment and our Somerville/Davis Square location is accessible via Red Line, commuter rail and rail trail. Our benefits package currently includes 100% paid health plan, 401K, profit sharing, vacation and more.

Interested candidates should send a cover letter and resume to careers@hcr-group.com. Please no phone calls.
