The Boston University Department of Biomedical Engineering (BU BME) anticipates an opening for a tenured Professor faculty position in Neural Engineering or Quantitative Neuroscience, pending approval by the Provost.

BU BME is a top-ranked department and one of the largest in the nation with 39 tenured or tenure-track primary faculty. We attract exceptional graduate student and faculty talent at all levels and have strong ties to the BU School of Medicine, as well as other top medical research centers in the Boston area. Research activity by primary faculty is approximately $30M per year. Our faculty benefit from strong infrastructure, nurtured by being one of only three awardees of a Whitaker Foundation Leadership Award and funding from the Coulter Foundation, to translate research advances into new applications that impact society. BU BME faculty lead and participate in several high-profile, interdisciplinary research centers, including BUNano, the Center for Biological Design, the Center for Future Technologies in Cancer Care, the Neurophotonics Center, the Systems Neuroscience Center, the Center for Research in Sensory Communication and Neural Technology, our renowned Photonics Center, and the Hariri Center for Computing and Computer Engineering. We have particular interest in building already-strong interactions with the Division of Materials Science and the Graduate Program in Neuroscience.

Boston University is an AAU institution with a rich tradition dedicated to inclusion and social justice. We are proud that we were the first American university to award a PhD to a woman and that Martin Luther King Jr. received his PhD here. We are dedicated to increasing the participation of all talented students and are committed to the pursuit of engineering by underrepresented groups at BU and beyond.

Candidates must hold a PhD in an appropriate area, have a strong history of external funding, and be internationally recognized for distinguished contributions in their fields. Successful candidates will be expected to maintain a robust, extramurally funded research program building on existing strengths and new collaborations, and to mentor junior researchers effectively. Candidate will be expected to teach both undergraduate and graduate courses.
