Expectations for Research/Talent Mentors

1. Work with students to develop research proposal and plan; supporting student in being responsive to criteria provided for GCSP projects. This is intended to be consistent with supporting efforts such as developing proposals for undergraduate scholarships (e.g., Lutchen Fellowships)

2. Check in with students throughout the experience minimally:
   a. At project start
   b. Project midpoint
   c. Two weeks prior to project completion
   d. Project completion

3. Provide mentor assessment of student performance based on GCSP talent rubric

We recommend that you review the talent rubric prior to developing the project plan with the student.
