U-Design Scholarship Information

Scholarships for U-Design are reviewed case-by-case, and are awarded on a needs basis. If you are interested in applying for a U-Design scholarship, prior to registration you must:

1. Contact the Program Coordinator Ann Mahoney via email at u-design@bu.edu, or by phone at 617-353-6919, expressing interest. After initial contact, you will be supplied with any additional information you may be seeking concerning U-Design scholarships.

2. After contact with the Program Coordinator, please provide any form(s) confirming financial need. The following are documents and/or programs that are accepted as verification of financial need as part of our scholarship evaluation. Only one (1) category of documentation is required.
   - Free or reduced school lunch program (for schools outside of Boston)
   - WIC program
   - Food stamp program
   - Subsidized housing (Section 8)
   - Unemployment verification
   - MA Health Insurance
   - Documentation of financial hardship

   Email any of the above items or additional materials to u-design@bu.edu and use Scholarship Financial Need Documents for the subject line of your email. Email is the preferred way of submitting your documents to us. If email is not possible, you may also mail your materials to:
   
   Boston University  
   U-Design Program  
   c/o Ann Mahoney, Program Coordinator  
   College of Engineering  
   44 Cummington Mall  
   Boston, MA 02215

3. If you are selected as a recipient, you may register online after receiving approval and confirmation of scholarship award. Scholarship registration is password protected and will require administrative confirmation for registration.

   If granted a full scholarship, you will be prompted to pay a $100 deposit online to hold your child’s spot in the program. Upon completion of the program, you will be refunded the $100 deposit.

   We encourage all potential participants to commence the scholarship process as quickly as possible, since our program tends to fill up quickly, and scholarships are particularly sought-after.

   Ann Mahoney  
   K-12 STEM Outreach Coordinator
