MEng students must complete 32 credits: 2 CORE MSE courses (8 cr) MS 505 Thermodynamics and Statistical Materials AND MS 577 Electronic Optical and Magnetic Properties of Materials OR CAS PY 543 Introduction to Solid-State Physics (by instructor approval only). Students who demonstrate competence in a first-year 500-level thermodynamics and solid-state physics course through prior coursework may petition to substitute the core requirements by taking Other MS designated Core courses; 2 other Structured MSE Related Courses (8 cr); 1 structured Engineering Management Course (4 cr); 3 Elective Courses (12 credits) can be engineering, science, or engineering management courses including a Practicum requirement. A maximum of 3 engineering management courses (12 credits) may be used toward the degree. MEng students must maintain a cumulative GPA of 3.00 to remain in good academic standing and to graduate. All graduate courses are counted in the GPA. Grades of C− or lower are not acceptable for the MEng degree.
