To: Massachusetts Delegation Legislative Directors, Education LAs and Science LAs

From: Boston University – Jennifer Grodsky and Emily Burlij, Federal Relations
Harvard University – Suzanne Day and Jon Groteboer, Office of Federal Relations
Massachusetts Institute of Technology – William Bonvillian, Philip Lippel, and Kate Stoll, Washington Office

Date: February 26, 2016

Re: FY 2017 Programmatic Requests for Federal Science and Education Agencies

With the Appropriations Committee soliciting your office’s priorities for fiscal year 2017, we wanted to share with you some of our priorities for next year’s federal funding. We hope that this supports your efforts to submit programmatic requests to the Appropriations Committee; please let us know if we can provide any further information or assistance.

Federal support for research and student aid makes it possible for Massachusetts’s research universities to lead the way in scientific discovery and educating future leaders. Our institutions greatly appreciate your consistent work to enhance funding for scientific research and student support across the federal government. We recognize that, particularly in times of significant fiscal restraint and a basically flat budget, we are fortunate to have such champions of science and education amongst our delegation.

We urge Congress to build on the momentum of the FY2016 Omnibus Appropriations law by continuing to make research and higher education top priorities in the FY 2017 appropriations process. The Commonwealth’s research universities provide the highest quality education to thousands of students; we believe that protecting federal supports for students and early career scientists should be of the utmost importance.

Thank you for considering these requests, for your ongoing advocacy for research and education, and for your support of Massachusetts research universities.
Fiscal Year (FY) 2017 Appropriations Priorities

LABOR, HEALTH, AND HUMAN SERVICES, EDUCATION AND RELATED AGENCIES

National Institutes of Health (NIH)
FY 2017 Request: $34.5 billion
FY 2016 Enacted: $32.1 billion
President’s Budget: $33.1 billion

Dear Colleague: Circulated by Reps. David McKinley (R-WA), Andre Carson (D-IN) Susan Davis (D-CA) and Peter King (R-NY); Contact: Margie Almanza (Rep. McKinley), Erica Powell (Rep. Carson), Matt Weiner (Rep. Davis) or Jamie Matese (Rep. King) Deadline: March 18

Massachusetts institutions received over $2.4 billion in funding from NIH in FY 2014. Our researchers are making discoveries that bring us closer to treating and curing diseases such as cancer, Alzheimer’s disease, and mental health disorders. NIH also provides irreplaceable training support to early career biomedical researchers at our institutions; this support must be sustained so as not to disrupt the research workforce pipeline.

Department of Education, Pell Grants
FY 2017 Request: $5,935 Maximum Discretionary Award
FY 2016 Enacted: $5,815 Maximum Discretionary Award
President’s Budget: $5,935 Maximum Discretionary Award

The Pell Grant program is the foundation of federal student aid, helping approximately 138,000 low-income students attend college in Massachusetts. Our universities build on the foundation provided by Pell by supplementing federal aid with our own institutional financial aid. As a result, we can maintain affordability and outstanding educational quality.

FY 2017 Federal Work Study (FWS) Request: $990 million
FY 2016 FWS Enacted: $989.7 million
President’s Budget: $989.7 million

Massachusetts universities participate in campus-based student aid programs at a very high level, with an FWS allocation of nearly $44 million in the 2014-15 academic year. FWS helps student succeed in college and prepare for the world of work.

FY 2017 Supplemental Education Opportunity Grant (SEOG) Request: $757 million
FY 2016 SEOG Enacted: $733 million
President’s SEOG: $733 million

Campus-based student aid programs help students by leveraging federal dollars with universities’ own aid. SEOG awards are available to students with “exceptional need,” and $757 million would restore funding to the program’s fiscal year 2010 level.
Department of Education, Institute for Education Sciences
FY 2017 Request: $694 million
FY 2016 Enacted: $618 million
President’s Budget: $693.8 million

Investing in peer-reviewed education research activities at the Institute of Education
Sciences results in innovations in both teaching and learning, improving classrooms around
the nation.

Department of Education, International Education and Foreign Language
FY 2017 Request: $76 million
FY 2016 Enacted: $72 million
President’s Budget: $67 million

The Title VI/ Fulbright-Hays International Education and Foreign Language programs
support training in critical foreign languages, educational outreach activities for K-12
schools, and curriculum development for the multidisciplinary study of regions around the
world, including Africa and the Middle East. In an increasingly interconnected world, these
international education programs are an essential means for Massachusetts to develop a
globally fluent citizenry.

Graduate Assistance in Areas of National Need (GAANN)
FY 2017 Request: $31 million
FY 2016 Enacted: $29.3 million
President’s Budget: $29.3 million

GAANN fellowships provide financial support for Massachusetts graduate students
pursuing doctoral education in fields that are critical to national priorities, including:
biology; chemistry; computer and information sciences; engineering; mathematics;
nursing; physics; and educational assessment, evaluation and research.

COMMERCE, JUSTICE, SCIENCE AND RELATED AGENCIES

National Science Foundation (NSF)
FY 2017 Request: $8 billion
FY 2016 Enacted: $7.46 billion
President’s Budget: $7.96 billion

NSF is the federal government’s primary funder of basic research, supporting work across
scientific disciplines with the potential to foster breakthrough discoveries. In FY 2014, NSF
provided more than 1,200 awards totaling approximately $461 million to 104 institutions
in Massachusetts. NSF makes awards based on intellectual merit and broader societal
impact, through a proven system of peer review. Our institutions oppose efforts to
undermine the merit review process by singling out specific scientific disciplines for cuts or
termination.
National Aeronautics and Space Administration (NASA) Science account
FY 2017 Request: $5.9 billion
FY 2016 Enacted: $5.5 billion
President’s Budget: $5.6 billion

NASA’s footprint in Massachusetts is profound, and provides valuable learning opportunities at our institutions for both undergraduate and graduate students. NASA’s Science Mission Directorate addresses Earth Science, Planetary Science, Astrophysics, and Heliophysics, and funds the Space Grant Program to encourage space education. NASA is a key federal contributor to advancing research in the physical sciences on Earth and in space.

National Aeronautics and Space Administration (NASA) Space Technology
FY 2017 Request: $796 million
FY 2016 Enacted: $686.5 million
President’s Budget: $826.7 million

NASA Space Technology develops innovative tools from some of the best minds in science. Moreover, it funds fellowship programs to support the next generation of innovators on Massachusetts campuses.

DEFENSE

Department of Defense (DOD) Basic (6.1) Research
FY 2017 Request: $2.53 billion
FY 2016 Enacted: $2.3 billion
President’s Budget: $2.1 billion

Within the DOD 6.1 basic research program, our institutions support sustained funding for critical initiatives such as National Defense Education Program, which supports undergraduate scholarships, graduate fellowships, and research awards to exceptionally talented researchers; the National Defense Science and Engineering Graduate Fellowships program; and the Minerva Initiative, a unique social science research program that deepens understanding of the social, cultural, and political forces affecting areas of the world of strategic importance to the U.S.

Defense Advanced Research Projects Agency (DARPA)
FY 2017 Request: $2.97 billion
FY 2016 Enacted: $2.87 billion
President’s Budget: $2.97 billion

The Defense Advanced Research Projects Agency (DARPA) funds high-risk, high-reward research that can lead to innovative applications for the warfighter. DARPA is known for its willingness to fund research that others may be hesitant to support, leading to game changing technologies such as GPS and the Internet.
ENERGY AND WATER DEVELOPMENT AND RELATED AGENCIES

Department of Energy (DOE) Office of Science
FY 2017 Request: $5.67 billion
FY 2016 Enacted: $5.3 billion
President’s Request: $5.57 billion

The DOE Office of Science is a key funder of discovery-based and use-inspired basic research in fields including physics, chemistry, materials science, environmental science, advanced scientific computing, biology, and applied mathematics. Massachusetts universities and scientific organizations were awarded more than $91 million in DOE Office of Science funding in fiscal year 2015.

DOE Office of Energy Efficiency and Renewable Energy
FY 2017 Research Request: $2.108 billion
FY 2016 Enacted for Research: $1.406 billion
President’s Research Request: $2.108 billion (of $2.898 billion for EERE)

The Office of Energy Efficiency and Renewable Energy supports research, development, demonstration, and deployment of clean energy technologies. EERE’s role in Mission Innovation includes research and development for sustainable transportation and renewable energy, as well as DOE’s advanced manufacturing R&D. The office will also host proposed new Regional Innovation Partnerships which would link together universities, national laboratories, and entrepreneurs to stimulate clean energy development via regional innovation ecosystems.

DOE Advanced Research Projects Agency-Energy
FY 2017 Request: $350 million
FY 2016 Enacted: $291 million
President’s Request: $350 million

ARPA-E supports early-stage energy technologies with transformational potential in order to lessen our reliance on energy imports, reduce energy-related emissions such as greenhouse gases, and improve energy efficiency. The full request, which would allow the agency to hold competitions in 7 or 8 new areas, supports the Mission Innovation pledge. Sixteen active awards are currently being executed by Massachusetts’ teams, including some at each of our universities.
STATE AND FOREIGN OPERATIONS

Higher Education Partnerships, Higher Education Solutions Network
FY17 Request: $27.4 million
FY16 Enacted: $19.5 million
President’s Request: $19.5 million

The Higher Education Solutions Network is an innovative program that gives research universities an increased role in USAID’s efforts to stimulate real-world innovations addressing the world’s most challenging global development problems. Congress should also direct USAID to include in its next budget request specific funding levels for the Higher Education Solutions Network and other programs substantively engaging research universities in its work.

INTERIOR, ENVIRONMENT AND RELATED AGENCIES

National Endowment for the Humanities (NEH)
FY 2017 Request: $155 million
FY 2016 Enacted: $147.9 million
President’s Budget: $149.8 million

NEH provides support for humanities research, such as history, preserving endangered languages and cultures, and literature. NEH programs stimulate creativity and innovation, helping us better understand social and international dimensions of complex questions.
