Layouts
What do we mean by layouts?

- A layout is how you position the elements of your page
  - You can have columns
  - Move paragraphs and sections around
  - And you can do this all without changing the content of your HTML!

- Lets see a few examples
What is Artemis?
The Artemis Project is a five-week summer program directed by undergraduate women at Boston University. Founded in 1996 at Brown University, Artemis introduces rising 9th and 10th grade girls to computer science, targeting them at the critical age when the disparity between males and females in the sciences becomes most pronounced.

Accepted applicants will be asked to participate in a pre-program online orientation, which will be provided every day.

When/where does Artemis take place?
Artemis 2011 will be in session from Wednesday, July 6 to Wednesday, July 27. We will meet on the Boston University campus, located at 8 St. Mary's St. This year, we will be meeting in the new computer lab at the school, PHO 117, and all of our lessons and activities in PHO 117. Lectures from Monday to Friday, 9:00 a.m. - 4:00 p.m.

What will I learn?
We will spend part of each day in a computer lab, learning computer literacy through the use of programs such as Microsoft Powerpoint and Adobe Photoshop, or learning the basics of computer programming through web design in HTML and CSS, and languages like Java and Python. We will also spend part of each day in a classroom, where students will be introduced to the more theoretical aspects of computer science. During this portion of the day, we will cover topics such as...
