Romance Linguistics

This course looks at...

- How the Romance languages we know today evolved from their common ancestor, Latin.
- What modern Romance languages have in common, and how they differ.
- How to analyze various aspects of the grammar of Romance languages using the tools of modern linguistics.
- What the study of Romance languages has revealed about how language works in general.

**Prereq:**

CAS LX 250 Introduction to Linguistics;
and a Romance language or Latin
at the 4th-semester level or higher

**Linguistics major:**
Counts towards the Analysis of a Specific Language Requirement

**Instructor:** Neil Myler
