Advanced Syntax: Issues in modern syntactic theory

Prerequisite:
CAS LX 422/GRS LX 722 (Intermediate Syntax) or consent of instructor

Exploration of advanced topics in syntax, chosen in part based on student interest, through reading and critical discussion of both foundational and recent literature.

Topics include:
- Constraints on movement
- Cross-linguistic parameters
- Syntactic micro-structure
- Interactions with semantics, morphology, and phonology
- Theoretical approaches to cognitive architecture
