Academic Positions

Assistant Professor, Boston University, 2011–present

Member, Institute for Advanced Study, Princeton, NJ, 2010–2011

NSF Postdoctoral Fellow, University of California, Los Angeles, 2008–2010

Assistant Adjunct Professor, University of California, Los Angeles, 2007–2008

Education

Ph.D. Mathematics, University of California, Berkeley, 2007.

A.B. Mathematics, *magna cum laude*, Harvard University, 2002.

Grants

NSF Research Award, “Arithmetic Moduli at Infinite Level”, 2013–2016.

NSF Postdoctoral Research Fellowship in the Mathematical Sciences, 2008–2011.

NSF Graduate Research Fellowship, 2003–2006.

Research Fields

Number Theory, Arithmetic Geometry, Automorphic Forms, Representation Theory

Papers and preprints

Moduli of p -divisible groups, with Peter Scholze. To appear in Cambridge Journal of Mathematics.

Semistable models for modular curves of arbitrary level, submitted.

Maximal varieties and the local Langlands correspondence for $GL(n)$, with Mitya Boyarchenko, submitted.

On the computation of local components of a newform, with David Loeffler. Mathematics of Computation (2012), no. 278, 1179–1200.

Good reduction of affinoids on the Lubin-Tate tower. Documenta Mathematica 15 (2010) 981-1007.

The local Jacquet-Langlands correspondence via Fourier analysis, Journal de Théorie de Nombres de Bordeaux 22 (2010), no. 2.

Hilbert modular forms with prescribed ramification, International Mathematics Research Notices (2009), 1388–1420.

Beyond value at risk: Forecasting portfolio loss at multiple horizons, with Lisa Goldberg and Guy Miller. Journal of Investment Management 6 (2008), no. 2, 1–26.

Automorphic representations with local constraints, UC Berkeley Ph.D. dissertation, 2007.

Recent Conference talks

p -adic Hodge theory and beyond, Institute des Hautes Étude Scientifiques, Paris, Sep. 2013 (*invited speaker*).

Arizona Winter School 2013: Modular forms and modular curves, University of Arizona, Mar. 2013 (*taught one of four mini-courses*).

Towards a Local Proof of the Local Langlands Correspondence, University of Illinois at Chicago, May 2012 (*invited speaker*).

AMS Special Session on Arithmetic Geometry, Joint Mathematics Meetings, Boston, Jan. 2012 (*invited speaker*).

AMS Short Course: Computing with elliptic curves using SAGE, Joint Mathematics Meetings, Boston, Jan. 2012.

Boston-Keio Summer Workshop, Boston University, September 2011 (*series of three lectures*).

Workshop on L -functions, Galois Representations and Iwasawa Theory, University of Michigan, Ann Arbor, May 2011 (*invited speaker*).

Workshop on Galois Representations and Automorphic Forms, Institute for Advanced Study, Princeton, Mar. 2011 (*invited speaker*).

Motives and Modular Forms, a conference for Don Blasius' 60th birthday, IPAM, Los Angeles, Nov. 2010 (*invited speaker*).

Modular/Geometric Iwasawa Theory and p -adic L -functions, UCLA, Jun. 2010 (*invited speaker*).

Sage Days 22: Computing with Elliptic Curves, MSRI, Berkeley, Jun. 2010 (*two week mini-course*).

Computer Methods for L -functions and Automorphic Forms, CRM, Montreal, Mar. 2010 (*invited speaker*).

Computations related to the Birch and Swinnerton-Dyer Conjecture, CMI, Cambridge, MA, Dec. 2009 (*invited speaker*).

Recent Seminar Talks

Univ. of Chicago geometric Langlands seminar (two talks), Feb. 2013.

Univ. of Chicago number theory seminar, Feb. 2013.

Maryland Number Theory Day, Oct. 2012.

Univ. of Chicago number theory seminar, May 2012.

Univ. of Michigan group theory/Lie theory/number theory seminar, Apr. 2012.
Boston University number theory seminar (three talks), Jan. 2012.
Universität Bonn number theory seminar, Bonn, Nov. 2011.
Athens-Atlanta number theory seminar, Georgia Tech, Nov. 2011.
Brandeis number theory seminar, Oct. 2011.
Boston College number theory seminar, Oct. 2011.
Boston University Number theory seminar, Oct. 2011.
Harvard number theory seminar, Sep. 2011.
University of Michigan group theory/Lie theory/number theory seminar, Jan. 2011.
Rutgers number theory seminar, Dec. 2010.
IAS seminar on automorphic forms and Galois representations, Oct. 2010.
Stanford number theory seminar, Oct. 2010.
Univ. of Wisconsin number theory seminar, Madison, Sep. 2010.
UC Berkeley number theory seminar, Sep. 2010.
Vermont-Quebec number theory seminar, McGill, Sep. 2010.
London number theory seminar, King's College London, May 2010.
Cambridge number theory seminar, May 2010.
Colorado State Univ. number theory seminar, Apr. 2010.
Northwestern Univ. number theory seminar, Apr. 2010.
Univ. of Indiana number theory seminar, Mar. 2010.
Stanford number theory seminar, Mar. 2010.
Boston University number theory seminar, Dec. 2009.
Univ. of Washington number theory seminar, Apr. 2009.
UC Santa Cruz number theory seminar, Apr. 2009.

Other recent academic activities

Taught six-week course in algebraic number theory, PROMYS program, Boston University, Summer 2012.
Invited to Clay Research Conference, Oxford, Jun. 2012.
Visit to Peter Scholze, Universität Bonn, Nov. 2011.
Magma group, two-week visit, Sydney, May 2011.
Visit to University of Michigan, Jan. 2011.

Visit to Teruyoshi Yoshida, Cambridge University, May 2010.

Los Angeles Math Circle (Sunday workshop series in mathematics for advanced LA area high school students), lecturer, 2009-2010.

Park City Mathematics Institute, research program member, summer 2009.

Magma group (software for computational algebra), monthlong visit, Sydney, May 2009.

Sage Days 17: Computing with modular forms and L-functions, workshop participant, Lopez Island, WA, Sept. 2009.

UCLA number theory seminar, organizer, Fall 2008–Spring 2010.

Personal

Born April 17, 1982, Oceanside, NY, USA
