Before:

Welcome to the Department of Geography and the Environment at Boston University. Faculty in the Department of Geography offer coursework and conduct research on topics that bring together the Earth's physical and human components. From global warming to energy systems, the interface between human systems and the natural environment provides the focus on our teaching and research mission.

Specific teaching and research foci include: (1) remote sensing and geographic information systems; (2) energy and environment; (3) hydrology, biophysical energy and climate; and (4) economic geography and transportations studies. For further information regarding the department, please follow the links of the left-hand side of this web page, or view our departmental profile in Boston University's College of Arts and Sciences.

Attention: Please view the following link for information about a new faculty position available.

After:

Welcome

The Department of Geography and Environment offers coursework and conducts research at the cutting edge of geographical and environmental science and policy. Real world problems, world-class faculty, exciting and innovative interdisciplinary programs, and a dynamic student body make GEO a special place to study. From global warming to energy systems, the interface between society and the natural environment provides the focus of our teaching and research mission.

Specific teaching and research foci include:
- Remote sensing and Geospatial Technologies
- Energy and Environmental Policy
- Physical Geography, including Hydrology, Biophysical Ecology, & Climate
- Economic Geography and Transportation Studies

For further information regarding the department please follow the above links, or contact us at geo@bu.edu.
