served!*

Photonics Forum

Lab Safety Training

January's Photonics Forum will feature Lab Safety Training. The goal of the training program is to ensure that all individuals working in the laboratory have adequate instructional and hands-on training to perform their activities in a manner consistent with the *culture of safety* established at BU and BMC.

The training program is designed to meet the following standards of excellence:

- Based on hands-on requirements;
- Robust and comprehensive in nature;
- Logically designed;
- Focused on the functions performed by the individual;
- Compliant with regulatory requirements;
- Provides training for safe routine operations and for unplanned events.

Attendance will fulfill your annual Laboratory Safety and Hazardous Waste Management Training requirement.
