

Varian CARY 5000 UV-VIS-NIR Spectrophotometer

- CARY 5000 UV-VIS-NIR Spectrophotometer provides measurements in the range from 175 – 3300 nm using PbSmart NIR detector.
- Variable slit width (down to 0.1 nm) for data resolution control
- Schwarzschild coupling optics for high accuracy at low transmission levels
- Accessories for transmission, absorption and reflectance measurements.
