

Photonics Forum

“Ocean Optics Products for Photonics”

Instruments NE on Behalf of Ocean Optics

November 18, 2014

*11:45 a.m. -
1:15 p.m.*

9th Floor

Room 901

Photonics Center

*8 Saint Mary's
Street*

*Lunch will be
served!*

November's Photonics Forum will feature the company Instruments NE on behalf of Ocean Optics. The presentation will consist of a short PowerPoint review of Ocean Optics' products and technology, and a display of some of Ocean Optics standard products.

Ocean Optics would like to develop a dialogue with Boston University about the current needs and future development of Photonics technology at the Boston University Photonics Center. Questions are encouraged during this presentation.

Instruments NE has been a regional distributor and sales office for Ocean Optics since 2005. Mr. William Closs has a BSME and MBA, and started Instruments NE in 1990 representing high-end Spectroscopy and related accessories for JY-Horiba, Agilent, and Rigaku. He is currently working with Ocean Optics exclusively.

Ocean Optics produces miniature fixed grating spectrometers and accessories for academic research, industry, military, medical, and OEM applications. The company was started as a backyard business over 25 years ago and has since sold approximately 200,000 spectrometers and related systems. It was privately owned until it was purchased by Halma PLC (U.K.) in 2004.
