 Community College Connection

BOSTON
UNIVERSITY

“

I used the scanning electron microscope and it was amazing — I never would have had this opportunity. You see it in textbooks, but to really use it...it was just incredible!”

“

I wanted something that would get me engaged that has to do with real research... In my school it would be very difficult to find an opportunity like this.”

Hands-on Experience ★

Considering a career in science or engineering? Get started with a summer research experience at Boston University funded by the NSF. Working in a lab doing advanced research in the physical and life sciences, you will work with state-of-the art equipment and learn firsthand about the excitement of scientific discovery. Interact with and receive mentoring from both research faculty and graduate students. Get a headstart on your career by taking advantage of this opportunity.

Program:

- Six internships
- Ten-week program
- \$4,400 summer stipend
- Parking/public transportation allowance
- Boston University student privileges

The Boston University Community College Connection will give you the experiences that only a major research university can offer. Who knows where they will lead you!

Highlights ★

- Conduct interdisciplinary research in chemistry, biology, or physics
- Train on state-of-the-art instrumentation
- Obtain guidance in presentation, communication, and resume-writing skills
- Present work at university-wide research symposium
- Attend weekly science seminars and laboratory group meetings

Transfer Scholarships ★

Boston University offers a number of scholarships to Boston-area community college transfer students to enable them to complete a 4-year degree. For information about these scholarships please go to <http://www.bu.edu/prostars/cc/program/resources.html>.
