

Annual Report on Program Student Learning Outcomes Assessment

Program: **MA or PhD in Physiology or Biophysics**

Program Contact and Title: Professor David Atkinson, Chair, Department of Physiology & Biophysics; Associate Professor Esther Bullitt, Student Affairs and Admissions Committee Chair
College/School Contact and Title: MaryAnn Campion, Director of Program Assessment for GMS

1. List the learning outcomes for the program (if you are new to program assessment, you might want to begin with 3-5 primary outcomes):

All students graduating with the Ph.D. in Physiology or Biophysics from the School of Medicine are expected to:

- Generate an original body of work in the biomedical sciences that reflects critical thinking and independent thought.
- Demonstrate competencies in advanced research skills.
- Develop the ability to communicate both written and oral within their chosen field of expertise, with specialists and non-experts.
- Demonstrate a commitment to professional development and continued learning in their chosen field.

All students graduating with the masters in Physiology or Biophysics from the School of Medicine are expected to:

- Generate an original body of work or a library thesis in physiology or biophysics that reflects critical thinking and independent thought.
- Demonstrate competencies in research skills or library research skills.
- Develop the ability to communicate through written documents within their chosen field of expertise, with specialists and non-experts.
- Demonstrate a commitment to professional development and continued learning in their chosen field.
