

Annual Report on Program Student Learning Outcomes Assessment

Program: **M.S. in Medical Sciences**

Program Contact and Title: Gwynneth Offner, Ph.D. (Director)

College/School Contact and Title: MaryAnn Campion, Director of Program Assessment for GMS

1. Learning Outcomes

Students completing the M.S. in Medical Sciences Program are expected to:

- i. Demonstrate an in-depth and integrated knowledge of the processes underlying normal and abnormal function in the human body in preparation for advanced studies in a healthcare field.
- ii. Demonstrate the ability to work as part of a team to integrate and apply concepts in the medical sciences and draw linkages between structure and function at the level of molecules, cells, organs and systems.
- iii. Demonstrate the ability to critically read and analyze the scientific literature, propose and test a hypothesis and communicate findings clearly, incorporating them into the existing body of knowledge.
