

Bachelor of Science in Sociology

Student Learning Outcomes Assessment Proposal

Program: Bachelor of Science in Sociology
Academic Department: Department of Applied Social Sciences
Program Director/Coordinator: Maureen Sullivan
Department Chair: Daniel LeClair
College Contact: Lou Chitkushev

1. List the learning outcomes for the program:

Students graduating with a Bachelor's degree in Sociology will be able to demonstrate:

- Knowledge of core sociological theories, theoretical perspectives and schools of thought.
- Proficiency in sociological research methods and forms of inquiry that yield results appropriate for qualitative and quantitative data analysis.
- Familiarity with core themes, concepts, and empirical research in two topical areas of specialization within sociology (e.g., the sociology of work and occupations, or medical sociology).
- Proficiency in identifying and conducting literature reviews of valid sources of scholarly social research, knowledge, and information.
- Effectiveness in written and oral communication, consistent with standard academic styles and formats (e.g., research paper using APA style guide; oral presentation of research project).
