

Annual Report on Program Learning Outcomes Assessment

Program: BA in Computer Science

Program Contact and Title: Mark Crovella, Chair of Computer Science, 3-8919

College/School Contact and Title:

Date: February 18, 2016

1. List the learning outcomes for the program:

Students graduating with a BA in Computer Science are expected to:

1. Understand and evaluate the organization, design, and construction of hardware and software systems for computing.
2. Attain a level of mathematical ability allowing the student to formally abstract and analyze computational processes.
3. Analyze problems that require computation to answer, and design and implement appropriate problem solutions that are efficient and effective.
