

Annual Report on Program Learning Outcomes Assessment

Program: *Master's program in Manufacturing Engineering*

Program Contact and Title: *Alice White, Ph.D./Professor in Mechanical Engineering, aew1@bu.edu*

College/School Contact and Title: *Tom Little, Professor of Electrical Engineering and Associate Dean of Engineering, tdcl@bu.edu*

Date: *11/16/2015.*

1. List the learning outcomes for the program:

- *Carry out a significant project, either as part of a formal course or as part of an independent student, that demonstrate the students can carry out independent and practical aspects of mechanical engineering, such as might be required in future graduate level industrial or academic careers in mechanical engineering.*
- *Demonstrate superior independent thinking outside of the usual classroom setting, again as might be required in future graduate level industrial or academic careers in mechanical engineering.*
