

Annual Report on Program Learning Outcomes Assessment

Program: B.S. in Speech, Language and Hearing Sciences

Program Contact and Title: Kristine Strand, Program Director

College/School Contact and Title: Melanie Matthies, Sr. Assoc. Dean (matthies@bu.edu)

Date: 11/13/15

1. List the learning outcomes for the program:

- Graduates from the program will show measureable progress in the basic foundation knowledge that underlies research and clinical work in speech, language and hearing sciences.
- Graduates from the program will be able to apply hearing science, disability awareness, and audiological testing to an analysis of the effects of hearing loss on a specific individual that includes remediation recommendations.
- Students will analyze clinic patients, research labl experiences or other in-depth data that develops skills which can apply directly to their graduate school and/or post-BS employment opportunities.
- Students will interpret data from speakers with phonological disorders and support their conclusions by justifying their analyses, using primary journal articles and providing a coherent summary of their thought process.
- Students will apply their coursework to a clinical research or other professional setting to comoplete a project or other duties assigned by the internship superivsor.
