

Nancy S. Miller, M.D. is a board-certified pathologist (Anatomic and Clinical Pathology) and a clinical microbiologist-laboratory director with >18 years' experience in clinical infectious disease diagnostics. Her research interests include the development of in-vitro diagnostics for infectious diseases and comparative evaluation testing of instruments and assays for pre-clinical and clinical trials. This work includes PI-initiated commercial grants as well as entrepreneurial and NIH-supported collaborations with Boston University colleagues. Dr. Miller has been an expert panel member on advisory boards and guideline committees for commercial enterprises, government organizations (FDA, CDC), professional organizations (ASM, CAP) and the Clinical Laboratory Standards Institute.

Dr. Miller is currently Chief and Vice Chair of Laboratory Medicine and Medical Director of Clinical Microbiology at Boston Medical Center. She is an Associate Professor of Pathology and Laboratory Medicine at Boston University School of Medicine.
