SCHOLARSHIPS

Students compete nationally for AFROTC scholarships; criteria includes GPA, standardized test scores, physical fitness, and leadership skills. High school students may apply for a scholarship between June 1st and December 1st of their senior year at www.afrotc.com. In-college scholarships are available once a student has been in the program for more than a semester. Depending on the type, the scholarship may cover full or partial tuition, fees, and books. A monthly stipend is given to scholarship recipients, as well as juniors and seniors. To learn more, visit www.afrotc.com/scholarships.

HOSTED AT BOSTON UNIVERSITY, DET 355 EXTENDS ITS REACH TO NINE OTHER BOSTON AREA COLLEGES AND UNIVERSITIES TO AFFORD STUDENTS THE OPPORTUNITY TO COMMISSION INTO THE UNITED STATES AIR FORCE.

CADET CURRICULUM

On a weekly basis, all cadets attend an Aerospace Studies (AS) class, physical training sessions, and Leadership Lab. The program is designed for four academic years but can be condensed to three or extended to five years in certain circumstances.

GENERAL MILITARY COURSE (GMC)

Typically composed of freshmen and sophomore students, the AS classes are one credit hour and provide an overview of the basic characteristics, missions, and organization of the Air Force. Participation in the GMC carries no commitment to serve in the Air Force, unless the cadet has an AFROTC scholarship.

SUMMER FIELD TRAINING (FT)

A selective and intense summer training session, usually attended between a cadet’s sophomore and junior years, FT places a heavy focus on leadership under pressure, teamwork, and expeditionary skills.

PROFESSIONAL OFFICER COURSE (POC)

After successfully completing Summer FT, cadets enter the POC which consists of classes which meet for three hours a week. The junior class focuses on advanced skills and knowledge in management and leadership. The senior class gives cadets the foundation to understand their role as military officers in American society.

LEADERSHIP LAB (LLAB)

Cadets learn about Air Force heritage and values, practice military customs and courtesies, develop effective communication, and apply leadership skills.

PHYSICAL TRAINING (PT)

A high level of physical fitness and esprit de corps is instilled through participation in PT sessions. These sessions also prepare cadets for the physical fitness assessment held each semester.

CAREER OPPORTUNITIES

There is a wide variety of career fields. After graduation, students incur an active duty service commitment of 4, 6, or 10 years, depending on the assigned career field.

FLIGHT CAREERS

Pilot, Combat Systems Operator, Air Battle Manager, Remotely Piloted Aircraft Pilot

TECHNICAL CAREERS

Cyberspace or Space Officer, Engineer: Civil, Developmental, Nuclear

NON-TECHNICAL CAREERS

Intelligence, Aircraft Maintenance, Security Forces, Logistics Officer

MEDICAL CAREERS
