Tenure Track Faculty Position in Rehabilitation Science

Nominations and applications are invited for a tenure-track faculty position in Boston University’s College of Health and Rehabilitation Sciences: Sargent College. We are especially interested in candidates with expertise in interdisciplinary collaboration whose research is connected to areas of strength in the College who will help us expand our research doctoral programs in rehabilitation science. We invite applicants who have a clear vision of their research direction, who can relate the relevance of their work to the fields of occupational therapy, physical therapy, or speech, language and hearing sciences and whose research program is supported, or have strong potential for support, by external funding sources. Qualifications include an earned doctoral degree and peer reviewed publications. Post-doctoral experience is preferred.

This is a full time tenure track faculty position at the Assistant Professor level with a primary appointment in the most applicable department. The successful candidate will conduct an independent line of research, participate in service, and teach at the undergraduate and/or graduate level.

The College of Health and Rehabilitation Sciences: Sargent College is part of a vibrant academic and research community that includes 16 schools and colleges across Boston University’s Charles River and Medical campuses, as well as many highly regarded medical and educational institutions in the Boston area that allow for collaborative and interdisciplinary activities. The College offers a wide range of undergraduate, professional, and research programs in the health and rehabilitation sciences. The College’s three ranked graduate professional programs (physical therapy, occupational therapy, and speech-language pathology) all place in the top 8% nationally, and Sargent is among the national leaders in funded research. The environment is highly collaborative, and many faculty have intersecting research interests.

Active research areas include speech, language and hearing development and disorders; motor adaptation and the dynamics of walking; perception of complex signals, brain/computer interface development; development and assessment of the efficacy of rehabilitation technologies; effectiveness of interventions for serious mental illness; measurement of function in children and youth with disabilities; neurorehabilitation; and the influence of environmental factors on home and community participation. The College houses a wide range of research and clinical facilities, as well as two NIDRR Rehabilitation Research and Training Centers - one in the area of Psychiatric Rehabilitation and one in the area of Rheumatological Rehabilitation. Join our interdisciplinary faculty and become involved with our network of collaborations within Boston University and the greater Boston community.
