FUNDING INFORMATION

- 08/01/12 – 7/31/15 Centers for Medicaid/Medicare Services (CMS) PI: John Kane, MD,
Feinstein Institute
CMMI \$9,380,855; BU subcontract \$409,022
“Improving Care Reducing Costs in Schizophrenia with New Technologies
and New Personnel”
- The goal of this project is to develop a workforce capable of delivering effective treatments, using newly available technologies, to at-risk, high-cost persons with schizophrenia. The intervention will test the use of mental health practitioners trained to use new technology as part of the treatment regime for patients recently discharged from the hospital at community treatment centers in 9 states.
- Role: Site Principal Investigator
- 10/01/12 – 9/30/12 Boston University PI: Jennifer Gottlieb, Ph.D.
Dr. Gail Berg Endowed Research Fund \$15,000
“Cognitive-Behavioral Therapy for Post-Traumatic Stress Disorder:
Development of a Culturally-Adapted Intervention for Spanish-Speaking
Individuals with PTSD”
- The goal of this project is to develop a culturally appropriate intervention for Spanish-speaking persons with PTSD, based on an adaptation of our group’s evidence-based Cognitive-Behavioral Therapy (CBT) for PTSD in persons with Serious Mental Illness (SMI) intervention.
- Role: Principal Investigator
- 6/01/12 – 12/31/13 Boston University PI: Jennifer Gottlieb, Ph.D.
Dudley Allen Sargent Research Award \$7000
“A Randomized Controlled Trial of a Novel Computerized Internet-Based
Cognitive Behavioral Therapy Intervention for Auditory Hallucinations in
Schizophrenia: ‘The Coping with Voices Program’”
- The goal of this project is to evaluate, via a randomized controlled trial, the efficacy of an internet-based cognitive behavioral therapy computer program for individuals with persistent distressing auditory hallucinations. This award allows for increased sample size within the RCT.
- Role: Principal Investigator

- 9/01/11 – 8/20/13 R21 PI: Mary Brunette, MD., Dartmouth Medical School
National Cancer Institute (NCI) \$163,488
“Decision Support for Smoking Cessation in Young Adults with Severe Mental Illness”
- This research will further develop and conduct preliminary testing on a tailored, motivational, web-based decision support system for smoking cessation in young adults with severe mental illnesses. The overall goal is to prevent cancer and other smoking-related diseases in this group.
- Role: Co-Investigator
- 7/13/09 – 7/12/14 NIH Contract HHSN271200900019C PI: John Kane, M.D.
“Recovery After an Initial Schizophrenia Episode (RAISE)” \$25,290,274
- Initiative seeks to fundamentally change the trajectory and prognosis of schizophrenia through coordinated and aggressive treatment in the earliest stages of illness.
- Role: Co-Investigator
- 1/01/10 – 12/31/13 NARSAD/Brain and Behavior Research Foundation Young Investigator Award PI: Jennifer Gottlieb, Ph.D. \$60,000
“Internet-Based Cognitive Behavioral Therapy for Schizophrenia: A Pilot Randomized Controlled Trial Computer-Based Program for Auditory Hallucinations”
- The major goal of this project is to develop and evaluate a comprehensive computer-based program based on CBT for Psychosis principles, and to study its utility and effect on auditory hallucinations in outpatients with schizophrenia.
- Role: Principle Investigator
- 7/01/09 – 6/30/10 and 7/1/10 – 6/30/11 Dartmouth Medical School Dept. of Psychiatry PI: Jennifer Gottlieb, Ph.D.
Gary Tucker Junior Investigator Award \$35,500
“Internet-Based Cognitive Behavioral Therapy for Schizophrenia: A Pilot Randomized Controlled Trial Computer-Based Program for Paranoid Ideation”
- The major goal of this project is to develop and evaluate a comprehensive computer-based program based on CBT for Psychosis principles, and to study its utility and effect on paranoid ideation in outpatients with schizophrenia.
- Role: Principle Investigator
- 8/01/07 – 7/31/12 NIH R01 MH064662 PI: Kim Mueser, Ph.D.
“Cognitive Behavioral Therapy for Post Traumatic Stress Disorder in Persons with Serious Mental Illness” \$674,074
- The major goal of this randomized controlled trial (in community mental health clinics in New Jersey) is to evaluate the effectiveness of a modified version of CBT to reduce PTSD symptoms in individuals with serious mental illness.

Role: Co-Investigator, Study Coordinator

7/01/07 – 6/30/09

Harvard Medical School, Dept. of Psychiatry PI: Jennifer Gottlieb, Ph.D.
Livingston Fellowship Award \$10,000
“D-cycloserine Augmentation of Brief Cognitive-Behavioral Therapy
for Delusions”

The major goal of this pilot study is to examine the effect of d-cycloserine on abbreviated, 2-session CBT aimed at delusions in patients with schizophrenia spectrum disorders.

Role: Principal Investigator

7/01/07 – 6/30/10

NIDA: 1R01DA021245-01-A2 PI: Eden Evins, M.D.
“Smoking Cessation and Smoking Relapse Prevention in Patients with
Schizophrenia”

The major goal of this randomized controlled trial is to evaluate the effects of combined Cognitive Behavioral Therapy and extended pharmacotherapy (varenicline) on smoking cessation and relapse prevention for individuals with schizophrenia.

Role: Co-Investigator, Cognitive-Behavioral Supervisor/CBT Therapist

7/01/04 – 6/30/07

Sidney R. Baer, Jr. Foundation PI: Donald Goff, M.D.
“Enhancing the Clinical Care of Individuals Diagnosed with Schizophrenia.”

The major goals of this foundation-funded project were to: 1) educate the public about schizophrenia and, 2) provide enhanced clinical care via Cognitive-Behavioral Therapy for psychosis, and psychopharmacology and CBT for wellness, weight reduction, and smoking cessation for individuals with schizophrenia.

Role: Clinician and Investigator/Post-Doctoral Fellow

9/01/05 – 6/30/07

NIH R01 MH62629 PI: Kim Mueser, Ph.D.
“Family Intervention for SMI and Substance Abuse Disorders”

This research was a randomized controlled evaluation of a new behavioral family intervention program for individuals with co-occurring SMI diagnoses and substance use disorders and their relatives.

Role: Study Therapist
