

SED Server Instructions

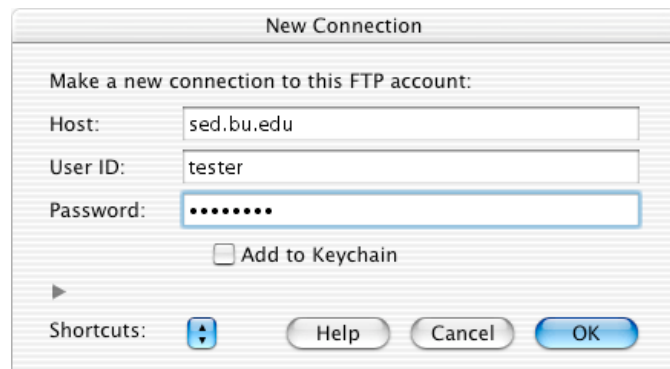

Remote connection, Mac OS9 and OSX

To connect to the SED server remotely (off campus) your computer must have an FTP program such as Fetch for Macintosh which is available free to members of the BU community. This can be downloaded at

<http://www.bu.edu/software/>

Connecting to the SED server using Fetch

1. Open Fetch and type in the host, user name and password as show below.

2. You can drag and drop files between the server, shown below, and your computer.
