

DEPARTMENTAL FACULTY PRACTICE REPRESENTATIVES (DFPRs)

Each academic concentration has a designated faculty member(s), referred to as the “Departmental Faculty Practice Representatives” (DFPR), who work with students throughout their Practicum. The DFPR must approve the proposed Practicum before the Practicum start date, and they also meet with students to provide feedback and approve the Learning Contract. The DFPR may also monitor student progress throughout the practicum, help in the development of the Departmental Integration Seminar, provide feedback and approve the Practicum abstract, and/or serve as a resource for the development of poster content for the student Practicum Poster Session.
