

**CENTRAL AMERICAN CHRONIC KIDNEY DISEASE FUND
at the BU SCHOOL OF PUBLIC HEALTH**

In support of Boston University, Azucareros del Istmo Centroamericano (AICA) is pleased to make a gift of \$900,000. This gift is to establish the Central American Chronic Kidney Disease Fund to support the research on Chronic Kidney Disease in Central America.

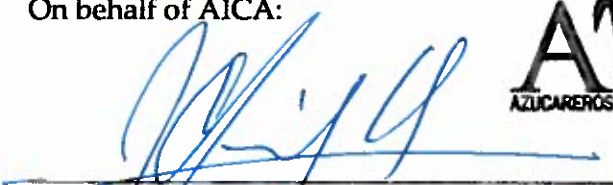

SPH will use this gift to support research activities investigating potential occupational and non-occupational risk factors of chronic kidney disease among workers in Central America. The gift is also intended to support SPH efforts to obtain additional external research funding to advance their work in this area.

SPH will provide AICA with progress reports on a quarterly basis, but the donors will have no opportunity to influence the research.

- SPH will maintain complete independence in the design and execution of all research.
- SPH is free to publish and disseminate all data and findings at its discretion and without donor oversight.

AICA will provide the resources in four installments and authorizes Boston University to publically recognize this gift in University materials and in academic publications.

On behalf of AICA:

Juan Carlos Fernández, Executive Director
Azucareros del Istmo Centroamericano (AICA)
