

# Ink, Toner & Batteries

BOSTON  
UNIVERSITY

**Dead batteries and empty cartridges don't have to go to waste!**

## **CARTRIDGES**

Millions of ink and toner cartridges are dumped into landfills every year, even though they are 100% recyclable for refill and reuse.

## **BATTERIES**

Batteries can leak harmful chemicals and heavy metals into the ground when disposed of improperly. When recycled, those same materials can be reclaimed and reused.

## **CARTRIDGE AND BATTERY RECYCLING TIPS**

Save landfill space and the environment: contact your Area Manager or bring your batteries and cartridges to 120 Ashford Street, Room 218
