

TurningPoint (Mac) Release Notes

Software Name: TurningPoint (Mac)
Release Date: 10/18/12
Version: 5.1.0
Support: support@turningtechnologies.com
Language: English
Overview:

Minimum System Requirements:

- Mac OS X 10.5.8 and up
- Intel processor 2GHz or higher
- 512 MB RAM
- 70 MB hard disk space
- Standard USB 1.1/2.0 port (for USB-based hardware devices)
- Ethernet or 802.11 compatible wireless network card required if ResponseWare is in use
- Java (for importing RTF, DOC, DOCX and QTI documents and exporting reports to Excel and CSV)

5.1.0

Enhancements:

- Added support for Mountain Lion (OS X 10.8).
- Added PresenterWare support for Anywhere Polling environment.
- Added import of DATAWISE participant lists, question lists, and export of sessions in DATAWISE supported format.
- Added support for a direct integration with Acuity in Self-Paced Polling.
- Added support for Anonymous participant lists in Self-Paced Polling.
- Added support for a direct integration with Performance Matters.
- Added ability in Results Manager to select a session and save the temporary device assignments from Real Time Registration or User ID matchup to the participant list.
- Added Device ID and User ID columns to the Overview Exports in Results Manager.
- Added searchable Help File with a Table of Contents for easier navigation.
- Added support for Results by Participant reports on Anonymous sessions.
- Added a new Export Scheme in Results Manager Export option named General Export Detailed which includes User Name, Device ID, User ID, each response from the session, and total points earned within the session.

Fixes:

- Unchecking "Show Results" no longer displays the results in ResponseWare.
- Question List bullet font now takes on font type and size from the Question List preferences set when creating the Question List.
- Question text now reflects the bullet type for QuickPoll questions.

- Corrupted or invalid file types now notify user of invalidity and don't create errors.
- Multiple Response questions now mark the question correct by determining that all answers were correct and that the number of responses equals the number of correct answers OR the response limit, whichever is smaller.
- Questions imported to an existing Question List will now take on the options from the Question List preferences set when creating the Question List.
- Importing a .csv file to a participant list no longer generates unexpected errors.

5.0.4

Fixes:

- Web Registration user matchup is no longer case sensitive.
- TurningPoint now only requires User ID and an unassigned Device ID to match to the Web Registration.
