A Hire Faculty form is used to hire/re-hire a Boston University (BU) faculty into a vacant position. There are 15 steps required to complete the form. Please refer to the glossary at the end of this document for the definitions of each of the 15 steps in the roadmap.

At Boston University, there are two types of faculty appointments: “Academic” and “Administrative”. To be hired as faculty, the candidate must have obtained an approved academic appointment. The appointment process is managed by the academic offices (Provosts and Deans) at Boston University who monitor the status of the appointment as it progresses through the various committees. The form must exist as an “Approved” status in FACTS (BU Faculty database). You must also contact the Faculty Actions Manager for the “IT9001 Data Sheet” so that you can complete the Faculty section (Step 13) of the hiring form. This procedure is also used for assigning an additional assignment to an existing faculty member. For instructions, click here.

As a pre-requisite to hiring/re-hiring, a position needs to have been created and approved via the completion of an Organizational Management (OM) “Create Position” form. If an existing faculty member is leaving and a new faculty needs to fill the position as a replacement, the existing faculty must first be terminated/retired and their position marked “open” via a Maintain Position action.
Hiring Faculty-Quick Reference Guide
