General overview:

This course is intended to give an overview of the periods, styles and artistic movements in Spain, starting with the prehistoric artistic manifestations and ending with an introduction to works from the contemporary period. Students will analyze historical context, traditional artistic expressions (painting, sculpture and architecture) and will be introduced to other more current artistic forms, such as installation or video art. At the same time, students will learn to interpret the most relevant works and prepare a critique to be presented during field trips.

Methodology

The lectures will give the student an intellectual framework to understand each period of Spanish Art and provide the students with sufficient tools to do the individual work. Lectures are intended to elaborate on the required readings and field trips; however, they constitute only one element of the course. Participation and presentations are an essential component of the final grade.

Requirements:

Students will have to complete the assigned readings before the day of the lecture. Lectures will not summarize the assigned reading but rather explore them in further depth and build upon related topics. Supplementary readings are intended for students who want to deepen their understanding of Spanish art and will serve as a basic bibliography for written projects. Students are required to attend all classes, field trips and other visits. If a student cannot attend one of these visits, he/she must do it on his/her own and submit an essay about the visit. Visits are scheduled on the syllabus or announced in class. In case of questionable student behavior in class or during a visit, and in any case of plagiarism, the class will adhere to the norms established by BU, which can be found here:

http://www.bu.edu/cas/students/undergrad-resources/code/
