The "Veterans RAND 36-Item Health Survey (VR-36)" and the "Veterans RAND 12 Item Health Survey (VR-12)" (formerly called the Veterans SF-36 and Veterans SF-12) were developed and modified from the original RAND Version of the 36-item Health Survey version 1.0 (also known as the MOS SF-36 and SF-12.) The 12 item health survey is a subset of identical items from the 36-item health survey for both the RAND and the Veterans versions. The Veterans version of the 36 item health survey and 12 item health survey were fully developed with support from the Veterans Health Study SDR 91006.S (P.I. Lewis Kazis) by the VA Health Services Research and Development Service Washington D.C. and the VA HSR&D Field Program also known as the Center for Health Quality, Outcomes and Economic Research (CHQOER). The VR-36 and VR-12 were developed with the use of federal funds and were modifications of the original RAND version. Information about the RAND 36-Item Health Survey is given at the Web Site: http://www.rand.org/health/surveys/sf36item/permission.html (see below).

We request that the user obtain permission for the use of the VR-36 and VR-12 (formerly called the Veterans SF-36 and SF-12) from the developer (Dr. Kazis) and adhere to the stipulations given below from the RAND Web site. There is no cost for the use of the assessments and we request permission only to keep track of its use.

CMS and NCQA have requested and received permission to use these instruments as part of the Medicare Health Outcomes Survey.

Sincerely,

Lewis E. Kazis, Sc.D.
Associate Professor and Director
Center for the Assessment of Pharmaceutical Practices (CAPP)
Boston University School of Public Health

RAND 36-Item Health Survey 1.0 Permission

RAND hereby grants permission to use "RAND 36-Item Health Survey 1.0" in accordance with the following conditions, which shall be assumed by all to have been agreed to as a consequence of accepting and using this document:

- Changes to the Health Survey may be made without the written permission of RAND. However, all such changes shall be clearly identified as having been made by the recipient.
- The use of this Health Survey accepts full responsibility, and agrees to indemnify and hold RAND harmless, for the accuracy of any translations of the Health Survey into another language and for any errors, omissions, misinterpretations, or consequences thereof.
- The user of this Health Survey accepts full responsibility, and agrees to indemnify and hold RAND harmless, for any consequences resulting from the use of the Health Survey.
- The user of the 36-Item Health Survey will provide a credit line when printing and distributing this document acknowledging that it was developed at RAND as part of the Medical Outcomes Study.
- No further written permission is needed for use of this Health Survey.
