ARCHAEOLOGICAL FIELD EXPERIENCE

Academic Projects

The Early Navajo Pastoral Landscape Project (ENPLP), Jan 2018 – present

- PI for NSF-funded dissertation project exploring the pericolonial scope and impacts of incipient pastoralism on 17th/18th century Navajo communities. The ENPLP consists of three phases to date: an ethnoarchaeology of contemporary shepherding on the Navajo Nation; GIS predictive modeling; and site mapping and soil testing at early Navajo sites in the Dinétah region of northwest New Mexico.

Navajo Culturally Modified Peeled Tree Study, May 2022 – present

- Co-PI for Bureau of Indian Affairs-funded project to record and dendrochronologically date culturally modified bark-peeled trees in the Chuska Mountains, NE AZ/NW NM. Peeled trees offer a glimpse into past human-environment relationships on the Navajo Nation, developing awareness and new insights on the meaning, context, and history of Diné population movements, land-use, and ceremonial practices.

San Diego de la Congregación Mission Excavation Project, June – July 2017, June 2019, June 2023

- Participated in exploratory excavations and conducted preliminary architectural recording and ground penetrating radar survey at Walatowa (Jemez Pueblo), New Mexico. Intended to mitigate adverse effects to the site and better understand the Spanish colonial-period history of the community.

UMass-Boston LA 20,000 (Sanchez Site) Project, June 2016

- Participated in the excavation of a Spanish colonial settlement in northern New Mexico with an eye towards better understanding the 17th-century cultural and environmental contexts of the region.

The Djenné Archaeological Survey, Conservation, and Mapping Project, Sept – Dec 2011

- Co-director of a planned year-long archaeological study and cultural preservation project in Djenné, Mali. Oversaw 6 weeks of work assisting the Mission Culturelle of Djenné with preparations for the Musée de Djenné's planned 'Salle d'Archéologie.' Planned the proposed archaeological survey component before the project was unfortunately cancelled in Dec 2011 due to security concerns.

Proyecto Arqueológico Pampas Gramalote, July – Aug 2011

- Assisted project director at the site of Pampas Gramalote, Huanchaquito, Peru. Conducted exploratory excavations around the main site; cataloged and recorded artifacts in preparation for eventual analysis.

Proyecto Arqueológico Las Llamas, Aug 2011

- Rescue archaeology project in Huanchaquito, Peru. Project uncovered more than 20 human burials dating to c. 1200 AD, accompanied by the complete remains of more than 30 camelids. Excavated and recorded remains in preparation for their eventual preservation by the Peruvian Institute of Culture.

Waterpoort Archaeological Project, July – Aug 2010

- Excavated at the site of Mutamba in Limpopo Province, South Africa. Carried out exploratory excavations across site; assisted in ceramic and faunal analysis; conducted flotation. Assisted in archaeozoological analyses at the National Cultural History Museum, Pretoria.

Timbuktu Expedition Project, Dec 2009 – Jan 2010

- Co-designed and personally carried out a pedestrian survey of an 8 km² area surrounding the site of Tombouze, Timbuktu Region, Mali. Assisted the excavation of the main unit; analyzed and recorded recovered ceramics in order to establish a cultural chronology for the region.

Gorbi Valley Survey Project, Jan 2010

- Assisted in the reconnaissance and survey of a series of poorly-known sites in the Lakes Region of Mali.

Yale University Bethlehem, PA Field School, Sept 2009 – May 2010

- Excavated the Bethlehem Colonial Industrial Quarter Dye Works. Combined total station data and remotely-sensed imagery to create an accurate GIS-based map of the entire Quarter and its surroundings.

PUCP San José de Moro Field School, June – Aug 2009

- Excavated at Moche cemetery site of San José de Moro, Peru. Recorded settlement architecture and funerary contexts; assisted in ceramic and archaeobotanical analyses. Helped survey the outlying settlement sites of San Ildefonso and Cerro Chepen.

Contract & Cultural Resource Management Projects (Selected)

Chaco Navajo Cultural Resource Landscape Inventory (CLI), Archaeology Southwest, *Ongoing*

- Independent contractor on an Archaeology Southwest-led CLI assessment of Chaco Culture National Historical Park. The project documents and evaluates the park's Navajo settlement landscape in order to improve the preservation and public interpretation of its Navajo occupation history.

Archaeological Survey of Three Navajo Nation Forestry Tracts for the Asaayi Lake Fire Rehabilitation Plan, NNHPD, 2015

- Lead archaeologist on a 70-acre pedestrian survey in preparation for post-fire reclamation activities by the Navajo Forestry Department in the Chuska Mountains, New Mexico, Navajo Nation. Planned and conducted the survey in collaboration with NNHPD, Navajo Forestry, and Navajo Nation Archaeology Department personnel, and prepared final report.

HKND Nicaragua Grand Canal Cultural Resources Survey, ERM, 2014

- An ERM field team leader for the 6-week long pedestrian survey of proposed canal route across southern Nicaragua. Served as the company representative in the field camp, participated in the preparatory reconnaissance visit, and helped develop a GIS-based predictive model highlighting prehistoric and historic-era archaeological site sensitivity for the proposed canal that was used to guide the survey teams.

Shell GC-GTL Archaeological Survey, ERM, 2013-2014

- Surveyor, excavator, and researcher for a Phase I and II archaeological investigation in south-central Louisiana to ensure compliance with Section 106 requirements related to two 19th-century sugar plantations in the project area.

Cultural Heritage Reconnaissance for Proposed Mexican Wind Farm, ERM, 2013

- Developed and carried out a cultural heritage 'red flags' assessment for a proposed wind farm on the Mexico-US border, including a targeted pedestrian survey of the Mexican project area and an evaluation of visual impacts on a cross-border community in the United States.

Archaeological Survey of USACE Habitat Management Units, Applied Earthworks, Inc., 2012

- Comprehensive cultural resource study of 7,500 acres along the Lower Snake River, WA. Crew member for pedestrian survey and subsurface shovel testing, as well as recordation of newly discovered and pre-existing prehistoric and historic period archaeological sites.
