BOSTON UNIVERSITY STUDENTS: COVID-19 REQUIREMENTS WHEN ARRIVING OR RETURNING TO CAMPUS FALL 2021

Schedule your first campus test bu.edu/healthway

All students, regardless of your vaccination status or travel history, are required to limit all interactions, except necessary trips for food, medical appointments, or COVID tests, until you receive one negative test result at BU. Testing will continue weekly thereafter.

All international travelers coming to the United States are required to have a negative COVID-19 test result no more than three days before travel, or documentation of recovery from COVID-19 in the past three months before they board a flight to the United States.

For CDC travel recommendations, please see International Travel and Domestic Travel.

A positive COVID-19 test:

You must go into isolation—
in designated campus housing (if you are a residential student) or your own off-campus housing (for nonresidential students)—until OK’d by a healthcare provider from Healthway.

bu.edu/healthway

If you have tested positive outside of BU, please submit your testing documentation via Patient Connect and stay-in-place until you speak to Healthway.

Close contact exposure:

You must go into close contact quarantine.

If you have been identified as a close contact, you must quarantine for 10–14 days in either a designated quarantine room (if you are a residential student) or your own off-campus housing (for nonresidential students). Please note that individuals who had COVID-19 in the last 90 days OR individuals who have received a WHO-approved vaccine at least 14 days ago and are not experiencing symptoms, are not required to quarantine following an exposure.
