**Upper Level Lab Courses Offered Fall 2023:**

| CAS NE 203 Principles of Neuroscience |  |
| CAS BI 218 Cell Biology with ISE 2 Lab |  |
| CAS BI 305 Plant Biology              |  |
| CAS BI 306 Biology of Global Change   |  |
| CAS BI 310 Human Structure & Function |  |
| CAS BI 311 General Microbiology       |  |
| CAS BI 315 Systems Physiology         |  |
| CAS/BI 407 Animal Behavior            |  |
| CAS BI/CH 421 Biochemistry 1          |  |
| CAS BI 513 Genetics Laboratory        |  |
| CAS BI 527 Biochemistry Lab 1         |  |
| CAS BI 561 Proteostasis in the Biology of Neurodegenerative Disease |  |

**REGISTRATION NOTES:**

- **Permission required courses:** Students may not register for these courses on their own, but may need the instructor to sign an Add/Drop form which the student would take to CAS Advising or the Registrar. If the course has a waitlist form, students should fill that out instead of contacting the professor about a spot. If the course is a research course, students should follow the instructions for submitting an application for research for credit on the corresponding department's website.

- **Full time status** is 12-18 credits per semester. Seniors are automatically awarded a fee waiver so that they may take up to 20 credits per semester without additional fees. Non-seniors with a 3.3 GPA may submit the CAS Course Overload Fee Waiver form.

- PDP, ROTC, and CAS FY/SY courses **do not count** toward the 128 credits needed to graduate with a BA from CAS.

- The following courses **do not count** toward the Biology or BMB major or minor:
  - CAS BI 105 Introductory Biology for Health Sciences
  - CAS BI 211 Human Physiology
  - CAS BI 527 (unless both sections of BI 527 & 528 are taken)
  - CAS BI 581 (unless two sections of BI 581 & 582 are taken)
  - CAS BI Readings or Research Courses (2-credit option)
CAS BI 105: INTRODUCTORY BIOLOGY FOR HEALTH SCIENCES

Prereq: High school biology and chemistry are assumed.

Not for Biology or BMB major/minor credit. Principles of biology; emphasis on cellular structure, genetics, microbiology, development, biochemistry, metabolism, and immunology. This course is appropriate for non-majors and students in the health and paramedical sciences (Sargent College). Students may not receive credit for BI 105 if BI 108 has already been passed. Carries natural science divisional credit (with lab) in CAS.

**Lecture**
A1 Hartmann Mon, Wed, Fri 9:05am - 9:55am

**Lab**
C1 Tue 1:30pm - 3:15pm
C2 Tue 3:30pm - 5:15pm
D1 Wed 10:10am - 11:55am
D2 Wed 12:20pm - 2:05pm
D3 Wed 2:30pm - 4:15pm
E1 Thu 1:30pm - 3:15pm

Notes: Not for Biology or BMB major or minor credit (BI 108 is recommended instead).

Textbooks & Technology: TBA

Grading: Four lecture exams (45%), lecture assignments and homework (20%), laboratory exercises and exams (35%).

Hub Units: Scientific Inquiry I, Quantitative Reasoning I, Research and Information Literacy.

---

CAS BI 107: BIOLOGY 1

Prereq: None; high school biology assumed.

The evolution and diversity of life; principles of ecology; behavioral biology. For students who plan to major in the natural sciences or environmental science, and for premedical students. Required for biology majors.

**Lecture**
A1 Mullen, Spilios, Wasserman Tue, Thu 12:30pm - 1:45pm
A2 Mullen, Spilios, Wasserman Mon, Wed, Fri 2:30pm - 3:20pm

**Lab**
B1 Mon 2:30pm - 5:15pm D5 Wed 2:30pm - 5:15pm
B2 Mon 2:30pm - 5:15pm D6 Wed 2:30pm - 5:15pm
B3 Mon 2:30pm - 5:15pm D7 Wed 6:30pm - 9:15pm
C0 Tue 8:00am - 10:45am D8 Wed 6:30pm - 9:15pm
C1 Tue 8:00am - 10:45am D9 Wed 6:00pm - 8:45pm
C2 Tue 8:00am - 10:45am E1 Thu 8:00am - 10:45am
C3 Tue 12:30pm - 3:15pm E2 Thu 8:00am - 10:45am
C4 Tue 12:30pm - 3:15pm E4 Thu 12:30pm - 3:15pm
C5 Tue 12:30pm - 3:15pm E5 Thu 12:30pm - 3:15pm
C6 Tue 3:30pm - 6:15pm E6 Thu 12:30pm - 3:15pm
C7 Tue 3:30pm - 6:15pm E7 Thu 6:30pm - 9:15pm
C9 Tue 6:30pm - 9:15pm E8 Thu 6:30pm - 9:15pm
D1 Wed 8:00am - 10:45am E9 Thu 6:30pm - 9:15pm
D2 Wed 6:30pm - 9:15pm F1 Fri 8:00am - 10:45am
D4 Wed 2:30pm - 5:15pm F2 Fri 8:00am - 10:45am

Textbooks & Technology: Hillis et al, Principles of Life, 3rd ed, Sinauer, 2019; ExamSoft Account; lab manual

Grading: Periodic lecture assessments, and lab assignments.

Hub Units: Scientific Inquiry I, Quantitative Reasoning I, Critical Thinking, Research and Information Literacy.
CAS BI 203: CELL BIOLOGY
Prereq: (CAS BI 108 or CAS NE 102) and CAS CH 102 or equivalent.
Coreq: CAS CH 203 or equivalent.
Principles of cellular organization and function: biological molecules, flow of genetic information, membranes and subcellular organelles, and cell regulation. Three hours lecture, one hour discussion.

Lecture
A1 Beffert Tue, Thu 9:30am - 10:45am
Mon 6:30pm - 8:00pm *
A2 Beffert Tue, Thu 3:30pm - 4:45pm
Mon 6:30pm - 8:00pm *

* These time slots are reserved for exams.

Discussion
B2 Mon 11:15am - 12:05pm
B3 Mon 12:20pm - 1:10pm
B4 Mon 1:25pm - 2:15pm
B5 Mon 12:20pm - 1:10pm
B6 Mon 1:25pm - 2:15pm
B7 Mon 11:15am - 12:05pm
B8 Mon 3:35pm - 4:25pm
C1 Tue 11:15am - 12:05pm
C2 Tue 11:15am - 12:05pm
D1 Wed 11:15am - 12:05pm
D2 Wed 12:20pm - 1:10pm
D3 Wed 1:25pm - 2:15pm

Notes: Class meets with BI 218 and BI 281. Students may receive credit for CAS BI 203 or 213, but not both courses.

Grading: Three midterm examinations, homework, in-class questions, discussion, and one final examination.

Hub Units: Scientific Inquiry 1, Quantitative Reasoning 1, Critical Thinking

CAS BI 211: HUMAN PHYSIOLOGY
Prereq: (CAS BI 105 OR CAS BI 108) & (CAS BI 106 OR CAS BI 210); or equivalent. First Year Writing Seminar (e.g., WR 100 or WR 120)
Not for Biology or BMB major/minor credit. Intro. to principles of systemic mammalian physiology with special reference to humans.

Lecture
A1 Co Mon, Wed, Fri 1:25pm - 2:15pm

Lab
B1 Mon 2:30pm - 5:15pm
B2 Mon 6:30pm - 9:15pm
C1 Tue 12:30pm - 3:15pm
C2 Tue 6:00pm - 8:45pm
D1 Wed 8:00am - 10:45am
D2 Wed 2:30pm - 5:15pm

Notes: Not for Biology or BMB major/minor credit (BI 315 is recommended for major credit instead).

Grading: 65% lecture; 5% teamwork; 30% lab.

Hub Units: Scientific Inquiry 2, Writing-Intensive, Critical Thinking, Teamwork/Collaboration

CAS BI 213: INTENSIVE CELL BIOLOGY
Prereq: CAS BI 108 and CAS CH 102 or equivalent.
Coreq: CAS CH 203 or equivalent.
Recommended for students in BMB and the specialization in Cell Biology, Molecular Biology & Genetics. Alternative to CAS BI 203 emphasizing experimental approaches and in-depth discussion. Molecular basis of cell biology, including genomics, subcellular organelles, cell signaling, stem cells, and cancer.

Lecture
A1 Naya Tue, Thu 9:30am - 10:45am

Discussion
B1 Mon 12:20pm - 1:10pm
B2 Mon 1:25pm - 2:15pm
B3 Mon 4:40pm - 5:30pm
B4 Wed 12:20pm - 1:10pm

Notes: This course meets with CAS BI 218. Students may receive credit for CAS BI 213 or 203, but not both courses.

Grading: Two midterms, final exam, and discussion.

Hub Units: Scientific Inquiry 1, Quantitative Reasoning 1, Research & Information Literacy
CAS BI 218: CELL BIOLOGY WITH INTEGRATED SCIENCE EXPERIENCE 2 LAB
Prereq: CAS BI 116 and CAS CH 116 (or equivalent) or consent of instructor. Coreq: CAS CH 218.

[5 cr] Integration of cell biology with organic chemistry and neuroscience, with emphasis on how each discipline interacts experimentally. Laboratory focuses on synthesizing compounds and testing in biological systems.

Lecture
A1 Beffert Tue, Thu 9:30am - 10:45am
Mon 6:30pm - 8:00pm

A2 Beffert Tue, Thu 3:30pm - 4:45pm
Mon 6:30pm - 8:00pm

A3 Naya Tue, Thu 9:30am - 10:45am
Meets with BI 213.

Discussion
B1 Register for a BI 203 or 213 discussion.

Lab
L1 Bushell Wed. 1:25-5:25pm

Prelab
P1 Bushell Mon 2:30pm - 4:15pm

Grading: Lecture (75%) and laboratory (25%). Also see the BI 203 or BI 213 grading section.

Hub Units: Scientific Inquiry 2, Quantitative Reasoning 2, Teamwork/Collaboration, Writing-Intensive

CAS BI 225: BEHAVIORAL BIOLOGY
Prereq: CAS BI 107, CAS BI 108 and sophomore standing. Seats reserved for Behavioral Biology majors; other students must receive consent of instructor. BI 225 and BI 407 cannot be taken concurrently, and BI 225 cannot be taken following completion of BI 407.

Introduction to the evolution, ecology, physiology, neurobiology and genetics of behavior. Topics include behavioral adaptation, behavior and conservation, nerve cells, circuits, neuromodulators, and behavior, behavioral genetics and genomics, sociogenomics, the development of behavior, hormones and behavior, communication, sexual selection and reproductive behavior, cooperation and altruism, socioecology, social evolution and culture. Emphasis on the interdisciplinary analysis of behavior. Integrated lectures, discussions, and class exercises.

Lecture
A1 Pain Tue, Thu 2:00pm - 3:15pm

Discussion
B1 Pain Thu 3:35pm - 4:25pm
B2 Pain Fri 9:05am - 9:55am

Grading: 3 quizzes, research paper and class presentation, research article analysis and discussion; engagement and participation.

Hub Units: Philosophical Inquiry and Life’s Meanings, Writing-Intensive Course, Oral/Signed Communication
CAS BI 281: FUNDAMENTALS OF BIOLOGY 1

Limited to seven-year medical students. Principles of cellular organization and function: biological molecules, flow of genetic information, membranes and subcellular organelles, and cell regulation. Three hours lecture, one hour discussion, three hours lab.

Lecture
A1 Beffert Tue, Thu 9:30am - 10:45am
Mon* 6:30pm - 8:00pm
A2 Beffert Tue, Thu 3:30pm - 4:45pm
Mon* 6:30pm - 8:00pm

*Time slot reserved for exams.

Lab
C1 Fri 8:00am - 10:45am
D2 Fri 11:15am - 2:00pm

Discussion
Please register for a BI 203 discussion.

Textbook & Technology: See the BI 203 Textbooks & Technology section.

Grading: See the BI 203 Grading section.

Hub Units: Scientific Inquiry 1, Quantitative Reasoning 1, Critical Thinking

CAS BI 306: BIOLOGY OF GLOBAL CHANGE

Prereq: CAS BI 107; Recommended: CAS CH 101 or CH 171.

The ecological impacts of human activity on terrestrial and aquatic ecosystems. Climate change, forest decline, eutrophication, acidification, loss of species diversity, and restoration of ecosystems.

Lecture
A1 Templer Tue, Thu 11:00am - 12:15pm

Lab
B1 Tue 12:30pm - 3:15pm  C2 Wed 2:30pm - 5:15pm
C1 Wed 8:00am - 10:45am  D1 Thu 12:30pm - 3:15pm
E1 Fri 11:15am - 2:00pm

Grading: Two midterms (total of 40%), final examination (20%), and laboratory (included paper and presentation) (40%).

Hub Units: Scientific Inquiry II, Ethical Reasoning, Research and Information Literacy.

CAS BI 305: PLANT BIOLOGY

Prereq: (CAS BI 107 and CAS BI 108)

An introduction to the plant sciences, including plant structure and diversity; reproduction, growth, and development; and economic and medicinal uses. Emphasis on new developments in the plant sciences. Three hours lecture, three hours lab.

Lecture
A1 Primack Tue, Thu 9:30am - 10:45am

Lab
B1 Primack Mon 2:30pm - 5:15pm

Textbooks & Technology: TBA

Grading: TBA

CAS BI 309: EVOLUTION

Prereq: CAS BI 107 and CAS BI 108 or equivalent.

Introduction to modern concepts, controversies, and analytical approaches in evolutionary biology. Topics include adaptation, natural and sexual selection, species and speciation, phylogenetics, comparative analysis, basic population and quantitative genetics, origin of novelty, adaptive radiation, development and evolution.

Lecture
A1 Mullen Mon, Wed, Fri 10:10am - 11:00am

Discussion
B1 Wed 12:20pm - 1:10pm  B3 Thu 11:15am - 12:05pm
B2 Wed 1:25pm - 2:15pm  B4 Thu 3:35pm - 4:25pm

Grading: 2 midterms (50%), final (25%), and discussion (25%)

Hub Units: Ethical Reasoning
CAS BI 310: HUMAN STRUCTURE & FUNCTION
Prereq: CAS BI 108 and CAS BI 203
Examines the cells and tissues that make up our organs (histology), the structure and interactions of the organ systems (anatomy), and how disease reshapes our bodies (pathology). As a secondary focus, this course also studies and critiques educational media related to human anatomy, and builds introductory competency in health communication.

Lecture
A1 Co Mon, Wed, Fri 11:15am - 12:05pm

Lab
B1 Tue 12:30pm - 3:15pm
B2 Tue 3:30pm - 6:15pm

Grading: Four lecture exams (45%), multi-part media project (15%), lecture assignments and homework (10%), laboratory exercises and exams (30%).

Hub Units: Scientific Inquiry I, Digital/Multimedia Expression, Creativity/Innovation

CAS BI 311: GENERAL MICROBIOLOGY
Prereq: CAS BI 203 and CAS BI 206 or equivalent or consent of the instructor and WR 120 or equivalent.
Organisms discussed include bacteria, archaea, viruses, fungi, protists, and algae. Course will cover microbial diversity, the environmental and human micro biomes, and technologies used to study microbes today. Global issues of emerging infectious disease, agriculture and microbial responses to global change are discussed.

Lecture
A1 Bhatnagar Mon, Wed, Fri 10:10am - 11:00am

Lab
B1 Mon, Wed 12:20pm - 2:05pm
B2 Mon, Wed 2:30pm - 4:15pm
B3 Tue, Thu 9:00am - 10:45am
B4 Tue, Thu 1:30pm - 3:15pm
B5 Tue, Thu 3:30pm - 5:15pm
B6 Mon, Wed 10:10am - 11:55am
B7 Mon, Wed 4:30pm - 6:15pm

Grading: Exams (21%), wiki assignment (13%), lab assignments (45%), participation (5%), and final exam (13%).

Hub Units: Scientific Inquiry 2, Writing-Intensive, Critical Thinking, Teamwork/Collaboration
CAS BI 325: PRINCIPLES OF NEUROSCIENCE
Prereq: CAS BI 203 or consent of instructor.
This course will introduce fundamentals of the nervous system at descriptive scales ranging from individual cells to the entire brain. Topics will include biophysics of excitable membranes, synaptic transmission, sensory and motor systems, learning and memory, plasticity, neuromodulation, and the biological basis of complex behaviors.

Lecture
A1 Gavornik Tue, Thu 12:30pm - 1:45pm

Discussion
B1 Wed 12:20pm - 1:10pm B5 Fri 11:15am - 12:05pm
B2 Wed 1:25pm - 2:15pm B6 Fri 12:20pm - 1:10pm
B3 Fri 9:05am - 9:55am B7 Wed 9:05am - 9:55am
B4 Fri 10:10am - 11:00am B8 Wed 3:35pm - 4:25pm

Notes: Meets with NE 203.
Grading: Texts, quizzes, and participation.
Hub Units: Scientific Inquiry 2, Critical Thinking

CAS BI 407: ANIMAL BEHAVIOR
Prereq: CAS BI 107.
The science of ethology on a hormonal, neural, and evolutionary level. Special emphasis will be on significance and adaptiveness of an expressed behavior. Individual lab projects as well as some prepared labs may require more than the scheduled time. BI 407 and BI 225 cannot be taken concurrently.

Lecture
A1 Wasserman Tue, Thu 3:30pm - 4:45pm

Lab
B1 Mon 2:30pm - 5:15pm F1 Fri 2:30pm - 5:15pm
E1 Thu 12:30pm - 3:15pm

Notes: Meets with BI 607.
Textbooks & Technology: None.
Grading: Three exams plus discussion grade.
Hub Units: Philosophical Inquiry & Life’s Meanings, Ethical Reasoning, Research & Information Literacy

CAS BI 408: INSECT BIOLOGY
Prereq: (CASBI107 & CASBI108) CAS BI 303 is recommended.
Course explores the biology of insects, focusing on insect diversity and complexity. Lectures will focus on various aspects of insect biology, including development, physiology, behavior, ecology and evolution. Lab will focus on insect diversity.

Lecture
A1 Casasa Velez Mon, Wed 10:10am - 11:00am

Lab
A1 Mon 2:30pm - 5:15pm

Textbooks & Technology: TBA
Grading: TBA

CAS BI 410: DEVELOPMENTAL BIOLOGY
Prereq: CAS BI 203 or BI 213 or BI 218 or consent of the instructor.
Contemporary aspects of embryonic development are covered, drawing from current literature. There is an emphasis on the use of experimental approaches to address topics such as polarity in the egg, body axis specification, embryonic patterning, and organogenesis.

Lecture
A1 Bradham Tue, Thu 2:00pm - 3:15pm

Discussion
B1 Wed 1:25pm - 2:15pm B5 Fri 11:15am - 12:05pm
B2 Wed 2:30pm - 3:20pm B6 Fri 12:20pm - 1:10pm
B3 Fri 9:05am - 9:55am B7 Wed 9:05am - 9:55am
B4 Fri 10:10am - 11:00am B8 Wed 3:35pm - 4:25pm

Notes: Meets with GRS BI 610.
ExamSoft account.
Grading: Three exams plus discussion grade.
Hub Units: Scientific Inquiry 2, Critical Thinking
**CAS BI 421: BIOCHEMISTRY 1**

*Prereq: CAS CH 204 or CAS CH 212 or CAS CH 214 or equivalent and WR 120 orr equivalent.*

Introductory biochemistry. The following topics are covered: protein structure and folding; enzyme mechanisms, kinetics, and allostery; nucleic acid structure; lipids and membrane structure; bioenergetics; vitamins and coenzymes; introduction to intermediary metabolism. See BI 527 for lab content.

**Notes:** This class meets with CAS BI/CH 527, GRS BI/CH 621, and MET CH 421. Students may also register for the CH 421 laboratory and discussion sections; however, preference in registration for these sections will be given to chemistry majors.

**Grading:** Exams (65%), and lab (35%).

**Hub Units:** Quantitative Reasoning 2, Writing-Intensive, Critical Thinking, Teamwork/Collaboration

---

**CAS BI 443: TERRESTRIAL BIOGEOCHEMISTRY**

*Prereq: CAS BI 107 or CAS ES 105 and CH 101/102, or consent of instructor.*

The patterns and processes controlling carbon and nutrient cycling in terrestrial ecosystems. Links between local and global scales are emphasized. Topics include net primary production, nutrient use efficiency, and biogeochemical transformation.

**Independent**

**Notes:** Meets with BI 643.

---

**CAS BI 448: CONSERVATION BIOLOGY**

*Prereq: (CASBI303 OR CASBI306) or consent of instructor.*

The study of biological diversity and modern methods to protect endangered plant and animal species. The environment, population, and genetic and human factors that affect the survival of species are examined for temperate and tropical communities, as well as terrestrial and aquatic habitats. Three hours lecture, one hour discussion. Effective Fall 2020, this course fulfills a single unit in each of the following BU Hub areas: Oral and/or Signed Communication, Ethical Reasoning.

**Textbooks & Technology:** TBA

**Grading:** TBA
CAS BI 510: INSTITUTIONAL RACISM IN HEALTH AND SCIENCE

Prereq: CAS BI 126 or CAS BI 206/216 or ENG BE 209 and senior standing, or consent of instructor.

Historically, pseudoscientific theories have provided the justification for establishing and maintaining racial hierarchies, which resulted in centuries of dehumanizing and unethical practices meted out to Blacks, Indigenous, and People of Color (BIPOC). Unfortunately, many of these pernicious ideas persist, such that they hinder BIPOC’s opportunities in Science and exacerbate their health outcomes. This course traces the historical roots (e.g. mischaracterization of race as a biological construct) and physiological manifestations of racism in science, and examines harmful consequences on victims’ health outcomes.

Lecture and Discussion
A1 Osborne Mon, Wed, Fri 2:30pm - 3:20pm

Notes: Meets with ENG BF 510.

Grading: Writing assignments/homework, discussion, capstone project

CAS BI 513: GENETICS LAB

Prereq: CAS BI 203 and CAS BI 206, senior standing, and consent of instructor.

Genetic techniques such as mutant selection and screening, complementation, mapping, recombinant DNA, and targeted mutagenesis are taught using the genetic model systems Escherichia coli, Saccharomyces cerevisiae, and Arabidopsis thaliana. Short-term and long-term projects in which students formulate and test hypotheses.

Lab
A1 Celenza Tue, Thu 12:30pm - 3:15pm
A2 Hartmann Tue, Thu 4:15pm - 7:00pm

Notes: To register for BI 513, please fill out this waitlist form: https://forms.gle/vspHGPGT5iD2JuWv7

Textbooks & Technology: TBA

Grading: Lab reports, homework, notebook and attendance.
CAS BI 515: POPULATION GENETICS
Prereq: (CASBI206 OR CASBI309) and (CAS MA 121/123 or CAS MA 115/213) or consent of instructor.
Examines evolutionary processes that give rise to genetic variation in populations, such as mutation, drift, and selection. Covers theoretical basis of population genetics including Hardy-Weinberg equilibrium, coalescence, neutral theory, and quantitative genetics, and application of techniques to real datasets.

Lecture
A1 Sorenson Mon, Wed, Fri 3:35pm - 4:25pm
Discussion
B1 Sorenson Wed 2:30pm - 3:20pm

Textbooks & Technology: TBA
Grading: TBA

CAS BI 520: SENSORY NEUROBIOLOGY
Prereq: (CASBI325 OR CASNE203) or consent of instructor.
A broad survey of sensory system function in model organisms and humans, focusing on fundamental principles of neural processing. Topics include basic cellular transduction, neural coding, and links between neural activity and sensory perception. Also offered as CAS NE 520.

Lecture
A1 Younger Tue, Thu 11:00am - 12:15pm
Discussion
B1 Wed 4:40pm - 5:30pm

Textbooks & Technology: TBA
Grading: TBA

CAS BI 527: BIOCHEMISTRY LAB 1
Prereq: (CAS CH 204 and CAS CH 212 and CAS CH 214) or CAS CH 282.
[2 cr] Not for Biology major or minor credit unless both BI 527 and BI 528 are taken. Emphasizes the purification and characterization of proteins and DNA. Development and use of modern instrumentation and techniques.

Lecture
A1 TBD Mon 12:20pm - 2:05pm
A2 TBD Tue 3:35pm - 4:50pm

Lab
BA Mon 10:10am - 2:10pm
BB Mon 3:35pm - 7:35pm
BC Tue 3:35pm - 7:35pm
B1 Wed 8:00am - 12:00pm
B2 Wed 1:25pm - 5:25pm
B3 Wed 6:30pm - 10:30pm
B4 Thu 8:00am - 12:00pm
B5 Thu 1:25pm - 5:25pm
B6 Thu 6:30pm - 10:30pm
B7 Fri 8:00am - 12:00pm
B8 Fri 1:25pm - 5:25pm
B9 Fri 6:30pm - 10:30pm

Notes: Meets with CAS CH 527, CAS BI 421, GRS BI/CH 621 and MET CH 421. Not for Biology major or minor credit unless both BI 527 and BI 528 are taken.

Grading: Attendance, pre-lab quizzes, lab notebooks and reports, safety, and participation.
Hub Units: Teamwork/Collaboration
CAS BI 551: BIOLOGY OF STEM CELLS
Prereq: CAS BI 203 or CAS BI 206 or consent of instructor.

Views on stem cell research range from assumptions of a potential cure for most diseases to fears that it will deprecate the value of human life. This course equips students with the science that underlies this discussion, including the biological properties of stem cells and the experimental hurdles to its utilization in regenerative medicine.

Lecture and Discussion
A1 Frydman Tue, Thu 9:30am - 10:45am
Thu 11:15am - 12:05pm

Notes: Primary literature will be provided on the blackboard site.

Textbooks & Technology: Primary literature will be provided on the blackboard site.

Grading: Midterm, final, presentation, and participation.

CAS BI 552: MOLECULAR BIOLOGY 1
Prereq: (CAS BI 203 or CAS BI 213) and CAS BI 206 or CAS BI 216.

How cells synthesize biologically important macromolecules (DNA, RNA and proteins), as well as their structure, function and regulation. Both prokaryotic and eukaryotic molecular biology are discussed. Topics include: DNA replication, DNA repair, recombination, prokaryotic transcription, translation, eukaryotic transcription/RNA processing, DNaseI hypersensitive sites, 5-methylcytosine, eukaryotic RNA polymerase structure/CTD modification, eukaryotic promoter structure, general transcription factors, enhancer-promoter loops, histone modification/chromatin remodeling, and non-coding RNA. Discussion of important molecular biological techniques such as genetic & recombinant DNA techniques, including CRISPR/Cas9.

Lecture
A1 Loechler Tue, Thu 11:00am - 12:15pm
Thu* 6:30pm - 10:30pm
A2 Loechler Tue, Thu 3:30pm - 4:45pm
Thu* 6:30pm - 10:30pm

*Time reserved for two exams during the semester (probably 10/13 & 11/17)

Discussion
B1 Tue 5:00pm - 5:50pm
B2 Wed 10:10am - 11:00am
B3 Wed 1:25pm - 2:15pm
B4 Wed 2:30pm - 3:20pm
B5 Wed 3:35pm - 4:25pm
B6 Thu 5:00pm - 5:50pm

Textbooks & Technology: TBD and TopHat.

Grading: 3 exams (25% each), homework (12.5%), and discussion participation (12.5%).

CAS BI 555: DRUG DISCOVERY IN NEUROSCIENCE
Prereq: CAS NE 102 (or BI 108), CH 102, and strongly recommended NE/PS 333, or consent of instructor.

The process of drug discovery is complex especially when a drug is intended to treat a neurological disease. This discussion-heavy course examines the specific challenges of modern neuroscience drug discovery, including: target selection, pharmacodynamics, animal models, and clinical trials. Effective Fall 2021, this course fulfills a single unit in each of the following BU Hub areas: Digital/Multimedia Expression, Scientific Inquiry II, Creativity/Innovation.

Independent
A1 Staff Mon, Wed 10:10am - 11:55am

Textbooks & Technology: TBD

Grading: TBD
**CAS BI 560: SYSTEMS BIOLOGY**

*Prereq: CAS BI 552 or consent of the instructor.*

Examines critical components of systems biology, including design principles of biological systems (e.g., feedback, synergy, cooperativity), and the generation and analysis of large-scale datasets (e.g., protein-protein interaction, mRNA expression).

*Independent*

**C1 Siggers** Mon, Wed 2:30pm - 4:15pm

**Textbooks & Technology:** Course readings provided via Blackboard.

**Grading:** Midterm 1, midterm 2 (midterm total 30%), final exam (40%), and class participation (30%).

---

**CAS BI 561: PROTEOSTASIS IN THE BIOLOGY OF NEURODEGENERATIVE DISEASES**

*Prereq: (CASNE102 OR CASBI108). CAS BI 203 or CAS BI 213 are recommended.*

A hands-on class focusing on the mechanisms that control protein homoeostasis, and on the approaches that we can use to study how it may change in conditions associated with neurodegenerative diseases. The class mimics, as much as possible, a real research environment, as students carry out experiments throughout the semester, learn how to develop and test new hypotheses, and also share knowledge through weekly readings and presentation of research articles inherent to the topics of the class. Effective Fall 2021, this course fulfills a single unit in each of the following BU Hub areas: Scientific Inquiry II, Creativity/Innovation, Research and Information Literacy.

*Independent*

**A1 Pastorino** Mon, Fri 2:30pm - 6:30pm

**Textbooks & Technology:** TBA

**Grading:** TBA

**Hub Units:** Scientific Inquiry 2, Research and Information Literacy, Creativity/Innovation

---

**CAS BI 566: DNA DYNAMICS IN DISEASE**

*Prereq: CAS BI 206 or 216, or approval from instructor.*

What goes wrong to cause disease? In this course we will examine diseases caused by problems in basic cellular processes including mitosis, meiosis, and DNA repair. We will focus on past and current research that has led to the understanding of the mechanisms contributing to disease. Content will be delivered through active, engaging lectures where you will analyze data from past and current research papers, and think critically to answer questions. Paper discussion days will include in-depth analysis of one primary literature article that is central to the field and addresses the content of that module. You will display the knowledge and skills learned through participation, problem sets, and exams.

*Independent*

**A1 Hartmann** Mon, Wed 10:10am - 11:55am

**Textbooks & Technology:** Primary literature and other materials will be provided.

**Grading:** Problem sets, exams, presentation, participation.

---

**CAS BI 572: ADVANCED GENETICS**

*Prereq: (CASBI206 & CASBI203) CAS BI 552 is recommended.*

An in-depth study of eukaryotic genetics, ranging from the history and basic principles to current topics and modern experimental approaches. Genetics of Drosophila, C. elegans, mice, and humans are explored in detail, including readings from primary literature. Three hours lecture, one hour discussion.

**Lecture**

**A1 McCall** Tue, Thu 11:00am - 12:15pm

**Discussion**

**A1 McCall** Wed 12:20pm - 1:10pm

**Textbooks & Technology:** Meneely, *Genetic Analysis: Genes, Genomes, and Networks in Eukaryotes*, 3rd Ed., Oxford University Press, 2020

**Grading:** 2 Midterms (20%), final exam (25%), problem sets (15%), discussion/participation (10%), and final presentation (10%).

---

**CAS BI 581 G1: SEMINAR IN BIOLOGY**

*Prereq: Consent of instructor.*

Informal discussion and student reports on subjects of current interest based on an intensive study of the literature. Topics and prerequisites vary. Not for Biology major or minor credit unless two sections of BI 581/582 are taken.

*Independent*

**G1 Gilmore** Thu 9:00am - 10:45am

**Textbooks & Technology:** TBA

**Grading:** TBA
CAS BI 588: PROJECT DESIGN AND STATISTICS IN BIOLOGICAL ANTHROPOLOGY
Prereq: CAS AN 102 or CAS BI 107/108 (for undergraduates) or graduate student standing, and/or consent of instructor.

This seminar teaches students project design and statistics using R and Rstudio. Students will become competent in coding, version control, data reports and commenting code, and implement both basic and advanced statistics to be used in student research projects.

Independent
A1 Schmitt Thu 3:30pm - 6:15pm

Notes: Meets with AN 588.

Grading: TBA

CAS BI 589: NEURAL IMPACTS ON TUMORIGENESIS
Prereq: NE 203 or BI 325

It has been known for some time that cancer cells leverage the tissue around them in order to allow for the formation and growth of a tumor, and ultimately to aid in its invasion of adjacent tissue and metastasize. Recent studies have shown a novel symbiotic interaction between the peripheral nervous system and tumors using reciprocal cross-talk. Topics of discussion will include neuronal invasion and mechanisms of neurogenesis into solid tumors, cross-talk in tumor microenvironments, nervous system influence on cancer modulators such as stem cells, inflammation and immune surveillance and extracellular signaling events that enhance tumorigenesis with attention paid to potential therapeutic interventions. Finally, we will explore if this nervous system/cancer interface might be a mediator for the effects of stress-induced cancer.

Independent
A1 Tullai Tue, Thu 12:30pm - 2:15pm

Notes: Meets with NE 589.

Textbooks & Technology: Primary literature will be provided on the Blackboard site.

Grading: Weekly quizzes, individual class presentations and participation in daily literature discussions.

Hub Units: Scientific Inquiry 2, Oral/Signed Communication, Research and Information Literacy
## Undergraduate Research in Biology

Undergraduate Research in Biology courses (CAS BI 140 - CAS BI 453) require an online application. For more information on research requirements and to apply, visit [www.bu.edu/biology/ug-research](http://www.bu.edu/biology/ug-research). Time commitment is a minimum of 6 hours a week for 2-credit research and 12 hours a week for 4-credit research. 4-credit research courses can fulfill up to two Electives, one of which can count toward the three-lab requirement for Biology and specialization majors.

### CAS BI 140: First Year Research in Biology 1

**Prereq:** first year standing, consent of instructor (faculty research mentor/sponsor), and approved application.

**[2 cr]** Not for Biology major or minor credit. First semester first year laboratory research under the supervision of a Biology faculty mentor. Application through the Biology Department. Research outside the Biology Department is acceptable if approved and overseen by a Biology faculty sponsor.

**Grading:** Course grade is determined by laboratory/field work performance.

### CAS BI 141: First Year Research in Biology 2

**Prereq:** first year standing, (BI 140 or UROP semester or equivalent), consent of instructor (faculty research mentor/sponsor), and approved application.

**[2 cr]** Not for Biology major or minor credit. Second semester first year laboratory research under the supervision of a Biology faculty mentor. Application through the Biology Department. Research outside the Biology Department is acceptable if approved and overseen by a Biology faculty sponsor.

**Grading:** Course grade is determined by laboratory/field work performance.

### CAS BI 240: Sophomore Research in Biology 1

**Prereq:** sophomore standing, consent of instructor (faculty research mentor/sponsor), and approved application.

**[2 cr]** Not for biology major or minor credit. First semester sophomore laboratory research under the supervision of a Biology faculty mentor. Application through the Biology Department. Research outside the Biology Department is acceptable if approved and overseen by a Biology faculty sponsor.

**Grading:** Course grade is determined by laboratory/field work performance.

### CAS BI 241: Sophomore Research in Biology 2

**Prereq:** sophomore standing, (BI 140 or BI 240 or UROP semester or equivalent), consent of instructor (faculty research mentor/sponsor), and approved application.

**[2 cr]** Not for biology major or minor credit. Second semester sophomore laboratory research under the supervision of a Biology faculty mentor. Application through the Biology Department. Research outside the Biology Department is acceptable if approved and overseen by a Biology faculty sponsor.

**Grading:** Course grade is determined by laboratory/field work performance.

### CAS BI 340: Junior Research in Biology 1 (2 Credits)

**Prereq:** junior standing, consent of instructor (faculty research mentor/sponsor), and approved application.

**[2 cr]** Not for Biology major or minor credit. First semester junior research including the use of research literature. Application through the Biology Department. Research outside the Biology Department is acceptable if approved and overseen by a Biology faculty sponsor. Students conduct research under supervision of a faculty mentor. Attendance at group meetings required. This course fulfills a single unit in the following BU Hub area: Research and Information Literacy.

**Grading:** Course grade is determined by laboratory/field work performance.

### CAS BI 341: Junior Research in Biology 2 (2 Credits)

**Prereq:** junior standing, consent of instructor (faculty research mentor/sponsor), BI 340 or BI 350 or 2 semesters of first year (BI 140/141) or sophomore research (BI 240/241) or UROP semester or equivalent, and approved application.

**[2 cr]** Not for Biology major or minor credit. Second semester junior research including the use of research literature and active participation at group meetings. Application through the Biology Department. Research outside the Biology Department is acceptable if approved and overseen by a Biology faculty sponsor. Students conduct research under supervision of a faculty mentor. Attendance with oral presentations at group meetings required. This course fulfills a single unit in the following BU Hub area: Oral/ Signed Communication.

**Grading:** Course grade is determined by laboratory/field work performance.
CAS BI 350: JUNIOR RESEARCH IN BIOLOGY 1 (4 CREDITS)
Prereq: junior standing, consent of instructor (faculty research mentor/spONSor), and approved application.
First semester junior research including the use of research literature and active participation at group meetings. Application through the Biology Department. Research outside the Biology Department is acceptable if approved and overseen by a Biology faculty sponsor. Students conduct research under supervision of a faculty mentor. Attendance with oral presentations at group meetings required. This course fulfills a single unit in the following BU Hub areas: Research and Information Literacy and Oral/Signed Communication.
Grading: Course grade is determined by laboratory/field work performance.

CAS BI 351: JUNIOR RESEARCH IN BIOLOGY 2 (4 CREDITS)
Prereq: junior standing, (BI 340 or BI 350 or 2 semesters of first year (BI 140/141) or sophomore research (BI 240/241) or UROP semester or equivalent), consent of instructor (faculty research mentor/spONSor), and approved application.
Second semester junior research including the use of research literature. Application through the Biology Department. Research outside the Biology Department is acceptable if approved and overseen by a Biology faculty sponsor. Students conduct research under supervision of a faculty mentor. Students expected to attend group meetings and take a lead and make creative contributions to projects. This course fulfills a single unit in the following BU Hub areas: Research and Information Literacy and Creativity/Innovation.
Grading: Course grade is determined by laboratory/field work performance.

CAS BI 352: JUNIOR RESEARCH IN BIOLOGY 3 (4 CREDITS)
Prereq: junior standing, (BI 341 or BI 351), consent of instructor (faculty research mentor/spONSor), and approved application.
Third semester junior research including the use of the research literature. Application through the Biology Department. Research outside the Biology Department is acceptable if approved and overseen by a Biology faculty sponsor. Students conduct research under supervision of a faculty mentor. Attendance at group meetings and final report required. Students expected to take a lead and make creative contributions to projects. This course fulfills a single unit in the following BU Hub areas: Writing-Intensive and Creativity/Innovation.
Grading: Course grade is determined by laboratory/field work performance.

CAS BI 450: SENIOR RESEARCH IN BIOLOGY 1
Prereq: senior standing, consent of instructor (faculty research mentor/spONSor), and approved application.
First semester senior research including the use of research literature and active participation at group meetings. Application through the Biology Department. Research outside the Biology Department is acceptable if approved and overseen by a Biology faculty sponsor. Students conduct research under supervision of a faculty mentor. Attendance at group meetings required. This course fulfills a single unit in the following BU Hub areas: Research and Information Literacy and Oral/Signed Communication.
Grading: Course grade is determined by laboratory/fieldwork performance.

CAS BI 451: SENIOR RESEARCH IN BIOLOGY 2
Prereq: senior standing, (BI 340 or BI 350 or BI 450 or 2 semesters of first year (BI 140/141) or sophomore research (BI 240/241) or UROP semester or equivalent), consent of instructor (faculty research mentor/spONSor), and approved application.
Second semester senior research including the use of the research literature. Application through the Biology Department. Research outside the Biology Department is acceptable if approved and overseen by a Biology faculty sponsor. Students conduct research under supervision of a faculty mentor. Students expected to attend group meetings and take a lead and make creative contributions to projects. This course fulfills a single unit in the following BU Hub areas: Research and Information Literacy and Creativity/Innovation.
Grading: Course grade is determined by laboratory/fieldwork performance.

CAS BI 452: SENIOR RESEARCH IN BIOLOGY 3
Prereq: senior standing, (BI 341 or BI 351 or BI 451), consent of instructor (faculty research mentor/spONSor), and approved application.
Third semester senior research including the use of research literature. Application through the Biology Department. Research outside the Biology Department is acceptable if approved and overseen by a Biology faculty sponsor. Students conduct research under supervision of a faculty mentor. Attendance at group meetings and final report required. Students expected to take a lead and make creative contributions to projects. This course fulfills a single unit in the following BU Hub areas: Writing-Intensive and Creativity/Innovation.
Grading: Course grade is determined by laboratory performance.
**CAS BI 453: SENIOR RESEARCH IN BIOLOGY 4**

*Prereq: senior standing, (BI 352 or BI 452), consent of instructor (faculty research mentor/sponsor), and approved application.*

*Coreq: CAS BI 497 or BI 498*

Fourth semester senior research including the use of research literature. Application through the Biology Department. Research outside the Biology Department is acceptable if approved and overseen by a Biology faculty sponsor. Students conduct research under supervision of a faculty mentor. Attendance at group meetings and final report required.

**Grading:** Course grade is determined by laboratory performance.

---

**CAS BI 402: HONORS RESEARCH IN BIOLOGY 2**

*Prereq: senior standing, cumulative GPA of at least 3.5, and approval of the Biology Research and Honors Committee.*

Honors-level mentored laboratory or field research with a faculty member of the Biology Department leading to graduation with Honors in Biology. A minimum grade of B+ in this course and in BI 497 or 498 and BI 402 is required to graduate with Honors in Biology. Application through the Biology Department including use of research literature. Students expected to attend and participate at group meetings and take a lead and make creative contributions to projects. This course fulfills a single unit in the following BU Hub areas: Oral/Signed Communication, Writing-Intensive, and Creativity/Innovation.

**Grading:** Course grade for BI 402 is determined by laboratory performance, oral presentation, written thesis, and defense of the thesis before a committee of three faculty members. Grades for both BI 401 and 402 are determined upon completion of BI 402.

---

**CAS BI 497: HONORS RESEARCH IN BIOLOGY SEMINAR 1**

*Prereq: For students currently enrolled in BI 401, BI 402, or BI 453 in the fall semester.*

[2 cr] A 2-credit weekly research seminar for students in BI 401, BI 402, or BI 453 in the spring semester. Students learn and present digitally produced descriptions of their research and prepare their theses for defense under the guidance of the Research and Honors Committee. A minimum grade of B+ in this course and BI 402 is required to graduate with honors. Students participate in only one course, either BI 497 or BI 498. This course fulfills a single unit in the following BU Hub areas: Digital/Multimedia Expression.

**Grading:** Attendance and participation

---

**CAS BI 495: MASTER'S RESEARCH IN BIOLOGY**

*Prereq: Admission into the MS or BA/MS combined program*

Biology laboratory research conducted under supervision of a faculty member. Externships are acceptable with prior approval. Minimum of 7.5 to 15 hours per week in the lab, culminating in submission of a written progress report.

**Grading:** Course grade is determined by laboratory performance.
UNDERGRADUATE RESEARCH IN BMB

Undergraduate Research in Biochemistry and Molecular Biology courses (CAS BB 140 - CAS BB 453) require an application. For more information on research requirements and to apply, visit www.bu.edu/bmb/research. Time commitment is a minimum of 6 hours a week for 2-credit research and 12 hours a week for 4-credit research, not including preparation and evaluation. 4-credit research courses can fulfill an elective for BMB majors. Two semesters of senior-level research can fulfill the Advanced Lab Elective for BMB majors but cannot also count towards the 2 BMB electives.

CAS BB 140: FIRST YEAR RESEARCH IN BMB 1

Prereq: first year standing, GPA in biochemistry and molecular biology (BMB) courses of at least 3.0, consent of instructor (faculty research mentor/sponsor), and approved application.

[2 cr] Not for BMB major credit. First semester first year laboratory research under the supervision of a BMB faculty mentor. Application through the BMB Program. Research outside the BMB Program is acceptable if approved and overseen by a BMB faculty sponsor.

Grading: Course grade is determined by laboratory performance.

CAS BB 141: FIRST YEAR RESEARCH IN BMB 2

Prereq: first year standing, (BB 140 or UROP semester or equivalent), GPA in biochemistry and molecular biology (BMB) courses of at least 3.0, consent of instructor (faculty research mentor/sponsor), and approved application.

[2 cr] Not for BMB major credit. Second semester first year laboratory research under the supervision of a BMB faculty mentor. Application through the BMB Program. Research outside the BMB Program is acceptable if approved and overseen by a BMB faculty sponsor.

Grading: Course grade is determined by laboratory performance.

CAS BB 240: SOPHOMORE RESEARCH IN BMB 1

Prereq: sophomore standing, GPA in biochemistry and molecular biology (BMB) courses of at least 3.0, consent of instructor (faculty research mentor/sponsor), and approved application.

[2 cr] Not for BMB major credit. First semester sophomore laboratory research under the supervision of a BMB faculty mentor. Application through the BMB Program. Research outside the BMB Program is acceptable if approved and overseen by a BMB faculty sponsor.

Grading: Course grade is determined by laboratory performance.

CAS BB 241: SOPHOMORE RESEARCH IN BMB 2

Prereq: sophomore standing, GPA in biochemistry and molecular biology (BMB) courses of at least 3.0, (BB 140 or BB 141 or BB 240 or UROP semester or equivalent), consent of instructor (faculty research mentor/sponsor), and approved application.

[2 cr] Not for BMB major credit. Second semester sophomore laboratory research under the supervision of a BMB faculty mentor. Application through the BMB Program. Research outside the BMB Program is acceptable if approved and overseen by a BMB faculty sponsor.

Grading: Course grade is determined by laboratory performance.

CAS BB 340: JUNIOR RESEARCH IN BMB 1 (2 CREDITS)

Prereq: junior standing, GPA in biochemistry and molecular biology (BMB) courses of at least 3.0, consent of instructor (faculty research mentor/sponsor), and approved application.

[2 cr] Not for BMB major credit. First semester junior research including the use of research literature. Application through the BMB Program. Research outside the BMB Program is acceptable if approved and overseen by a BMB faculty sponsor. Students conduct research under supervision of a faculty mentor. Attendance at group meetings required. This course fulfills a single unit in the following BU Hub area: Research and Information Literacy.

Grading: Course grade is determined by laboratory performance.

CAS BB 341: JUNIOR RESEARCH IN BMB 2 (2 CREDITS)

Prereq: junior standing, (BB 340 or BB 350 or 2 semesters of first year (BB 140/141) or sophomore research (BB 240/241) or UROP semester or equivalent), GPA in biochemistry and molecular biology (BMB) courses of at least 3.0, consent of instructor (faculty research mentor/sponsor), and approved application.

[2 cr] Not for BMB major credit. Second semester junior research including the use of research literature. Application through the BMB Program. Research outside the BMB Program is acceptable if approved and overseen by a BMB faculty sponsor. Students conduct research under supervision of a faculty mentor. Attendance at group meetings required. This course fulfills a single unit in the following BU Hub area: Research and Information Literacy.

Grading: Course grade is determined by laboratory performance.

CAS BB 350: JUNIOR RESEARCH IN BMB 1 (4 CREDITS)

Prereq: junior standing, GPA in biochemistry and molecular biology (BMB) courses of at least 3.0, consent of instructor (faculty research mentor/sponsor), and approved application.

First semester junior research including the use of research literature and active participation at group meetings. Application through the BMB Program. Research outside the BMB Program is acceptable if approved and overseen by a BMB faculty sponsor. Students conduct research under supervision of a faculty mentor. Attendance with oral presentations at group meetings required. This course fulfills a single unit in the following BU Hub areas: Research and Information Literacy and Oral/Signed Communication.

Grading: Course grade is determined by laboratory performance.
CAS BB 351: JUNIOR RESEARCH IN BMB 2 (4 CREDITS)
Prereq: junior standing, [BB 340 or BB 350 or 2 semesters of first year (BB 140/141) or sophomore research (BB 240/241) or UROP semester or equivalent], GPA in biochemistry and molecular biology (BMB) courses of at least 3.0, consent of instructor (faculty research mentor/sponsor), and approved application.

Second semester junior research including the use of research literature. Application through the BMB Program. Research outside the BMB Program is acceptable if approved and overseen by a BMB faculty sponsor. Students conduct research under supervision of a faculty mentor. Students expected to attend group meetings and take a lead and make creative contributions to projects. This course fulfills a single unit in the following BU Hub areas: Research and Information Literacy and Creativity/Innovation.

Grading: Course grade is determined by laboratory performance.

CAS BB 352: JUNIOR RESEARCH IN BMB 3 (4 CREDITS)
Prereq: junior standing, (BB 341 or BB 351), GPA in biochemistry and molecular biology (BMB) courses of at least 3.0, consent of instructor (faculty research mentor/sponsor), and approved application.

Third semester junior research including the use of the research literature. Application through the BMB Program. Research outside the BMB Program is acceptable if approved and overseen by a BMB faculty sponsor. Students conduct research under supervision of a faculty mentor. Attendance at group meetings and final report required. Students expected to take a lead and make creative contributions to projects. This course fulfills a single unit in the following BU Hub areas: Writing-Intensive and Creativity/Innovation.

Grading: Course grade is determined by laboratory performance.

CAS BB 450: SENIOR RESEARCH IN BMB 1
Prereq: senior standing, GPA in biochemistry and molecular biology (BMB) courses of at least 3.0, consent of instructor (faculty research mentor/sponsor), and approved application.

First semester senior research including the use of research literature and active participation at group meetings. Application through the BMB Program. Research outside the BMB Program is acceptable if approved and overseen by a BMB faculty sponsor. Students conduct research under supervision of a faculty mentor. Attendance with oral presentations at group meetings required. This course fulfills a single unit in the following BU Hub areas: Research and Information Literacy and Oral/Signed Communication.

Grading: Course grade is determined by laboratory performance.

CAS BB 451: SENIOR RESEARCH IN BMB 2
Prereq: senior standing, [BB 340 or BB 350 or BB 450 or 2 semesters of first year (BB 140/141) or sophomore research (BB 240/241) or UROP semester or equivalent], GPA in biochemistry and molecular biology (BMB) courses of at least 3.0, consent of instructor (faculty research mentor/sponsor), and approved application.

Second semester senior research including the use of the research literature. Application through the BMB Program. Research outside the BMB Program is acceptable if approved and overseen by a BMB faculty sponsor. Students conduct research under supervision of a faculty mentor. Students expected to attend group meetings and take a lead and make creative contributions to projects. This course fulfills a single unit in the following BU Hub areas: Research and Information Literacy and Creativity/Innovation.

Grading: Course grade is determined by laboratory performance.

CAS BB 452: SENIOR RESEARCH IN BMB 3
Prereq: senior standing, (BB 341 or BB 351 or BB 451), GPA in biochemistry and molecular biology (BMB) courses of at least 3.0, consent of instructor (faculty research mentor/sponsor), and approved application.

Third semester senior research including the use of research literature. Application through the BMB Program. Research outside the BMB Program is acceptable if approved and overseen by a BMB faculty sponsor. Students conduct research under supervision of a faculty mentor. Attendance at group meetings and final report required. Students expected to take a lead and make creative contributions to projects. This course fulfills a single unit in the following BU Hub areas: Writing-Intensive and Creativity/Innovation.

Grading: Course grade is determined by laboratory performance.

CAS BB 453: SENIOR RESEARCH IN BMB 4
Prereq: senior standing, (BB 352 or BB 452), GPA in biochemistry and molecular biology (BMB) courses of at least 3.0, consent of instructor (faculty research mentor/sponsor), and approved application.
Coreq: CAS BB 497 or BB 498

Fourth semester senior research including the use of research literature. Application through the BMB Program. Research outside the BMB Program is acceptable if approved and overseen by a BMB faculty sponsor. Students conduct research under supervision of a faculty mentor. Attendance at group meetings and final report required.

Grading: Course grade is determined by laboratory performance.
HONORS RESEARCH IN BMB

Honors Research in BMB offers students the ability to participate in two semesters of mentored 4-credit research (CAS BB 401 and 402) and 1-credit research seminars (CAS BB 497 and 498). Students also write and defend an honors thesis on their research. For more information on research requirements and to apply, visit www.bu.edu/bmb/research. Time commitment is a minimum of 12 hours a week, not including preparation and evaluation.

CAS BB 401: HONORS RESEARCH IN BMB

Prereq: senior standing, overall and BMB GPA of at least 3.5, and approval of application by the BMB Research and Honors Committee.

Coreq: BB 497.

Independent laboratory research under the supervision of a faculty member. Minimum of 12 hours per week in the lab, not including preparation and evaluation. Successful completion of both CAS BB 401 and BB 402 may lead to a degree with honors in the major, although only 4 of the credits may count toward the BMB major.

Grading: Course grade for both BB 401 and 402 is determined by laboratory performance, oral presentation, written thesis, and defense of the thesis before a committee of three BMB faculty members.

Hub Units: Oral and/or Signed Communication, Research and Information Literacy.

CAS BB 497: HONORS RESEARCH IN BMB SEMINAR

Coreq: BB 401.

A one-credit research seminar for students enrolled in Honors Research in BMB (BB 401). A minimum grade of B+ in this course and in CAS BB 401 and CAS BB 402 is required to graduate with Honors in BMB.

GRADUATE RESEARCH IN BMB

Graduate Research in BMB is offered as part of the BA/MA program. This dual degree program is only open to BMB majors and earns students a Bachelor's degree in BMB and a Master's degree in Biotechnology. For more information on the BA/MA program, visit www.bu.edu/bmb/bama-bulletin.

CAS BB 591: GRADUATE RESEARCH IN BMB

Prereq: admission to the combined BA/MA in Biotechnology Program.

BMB laboratory research conducted under supervision of a faculty member. Externships are acceptable if approved and overseen by a BMB faculty member or the BMB Director. Minimum of 15 hours per week in the lab, culminating in submission to the BMB Director of a written progress report and research outline for BB 592.
RESEARCH & READINGS

READINGS IN BIOLOGY
Readings in Biology offers students the opportunity to do library research on a chosen topic in the biological sciences. Students must ask a Biology faculty member familiar with the topic to be their sponsor and submit the application found at www.bu.edu/biology/forms. These courses are often used as preparation for Undergraduate Research in Biology or Honors Research in Biology. Open to Biology and BMB majors.

CAS BI 171: READINGS IN BIOLOGY 1
Prereq: first year standing, consent of instructor (Biology faculty mentor), and approved application.

[2 cr] Not for biology major or minor credit. Library research on a well-defined topic in the biological sciences, chosen in conjunction with a Biology faculty member.

Grading: Individual discussions and/or a paper presentation may be required.

CAS BI 271: READINGS IN BIOLOGY 2
Prereq: sophomore standing, consent of instructor (Biology faculty mentor), and approved application.

[2 cr] Not for biology major or minor credit. Library research on a well-defined topic in the biological sciences, chosen in conjunction with a Biology faculty member.

Grading: Individual discussions and/or a paper presentation may be required.

CAS BI 371: READINGS IN BIOLOGY 3
Prereq: junior standing, consent of instructor (Biology faculty mentor), and approved application.

[2 cr] Not for biology major or minor credit. Library research on a well-defined topic in the biological sciences, chosen in conjunction with a Biology faculty member.

Grading: Individual discussions and/or a paper presentation may be required.

CAS BI 471: READINGS IN BIOLOGY 4
Prereq: senior standing and consent of instructor (Biology faculty mentor), and approved application.

[2 cr] Not for biology major or minor credit. Intensive library research on a well-defined topic in the biological sciences, chosen in conjunction with a Biology faculty member. May be taken as preparation for Undergraduate Research or Honors Research in Biology.

Grading: Individual discussions and/or a paper presentation may be required.

GRADUATE READINGS IN BIOLOGY
Graduate Readings in Biology is offered as part of the BA/MS program. This dual degree program is only open to Biology and specialization majors. Students will receive both Bachelor’s of Arts and Master’s of Science degrees upon graduation. For more information on the BA/MS program, visit https://www.bu.edu/biology/undergrad/bams/.

GRS BI 701: GRADUATE READINGS IN BIOLOGY
Prereq: consent of instructor, limited to BA/MS students and graduate students in the scholarly paper MS program.

Library research on well-defined subjects determined in consultation with faculty member.

Grading: Individual discussions and/or a paper presentation may be required.
