

Intensive Cognitive and Communication Rehabilitation (ICCR) Program

Intensive Cognitive and Communication Rehabilitation Program for students with acquired brain injury (ABI). For more information, visit www.bu.edu/cbr/iccr or scan the QR code.

WHO

- Young adults up to 36 years old
 - » Have an acquired brain injury (ABI)
 - » Would like to enroll or return to college level

WHAT

- Evidence-based group & individual cognitive rehabilitation and simulated college semester with focused coursework
- Options include full-time, part-time enrollment

WHEN

- Group Sessions: Every Spring, Summer, and Fall (12 weeks)
 - » **Full-Time:** 4 days/week, 6 hours/day
 - » **Part-Time:** 2 days/week

WHY

- To provide intensive, contextualized treatment that promotes brain recovery and skill development to return to college level and attain academic and career goals

WHERE

- Teletherapy over Zoom / video conferencing

HOW

- Fees: \$6,000 for full-time enrollment
- For part-time enrollment fees, please contact us
- If program fees are a concern, please reach out— there may be options available

AT A GLANCE BENEFITS

- Evidence based
- Intensive contextualized treatment
- Group rehabilitation

TESTIMONIALS

"It's a **lifesaver**. When parents ask me, 'is it worth having my son or daughter do this?' I say **it will make a difference** and you will see the changes."

— Parent of ICCR Program Participant

"For many of these ICCR participants, this was the first time they had peers with **similar experiences**, who were in the same stage of life and **working towards the same goals**."

— ICCR Graduate Student Assistant

Intensive Cognitive and Communication Rehabilitation (ICCR) Program

BOSTON
UNIVERSITY

SUMMARY OF RESEARCH STUDIES

"After ICCR, participants showed gains in their cognitive-linguistic functioning, classroom participation, and individual therapy. They also demonstrated improvements outside the classroom and in their overall well-being. There is a gap between the large population of young adults with acquired brain injury who wish to return to higher education and a lack of rehabilitation programs supporting reentry into academic environments; ICCR is a first step in reducing that gap."

The Intensive Cognitive-Communication Rehabilitation Program for Young Adults With Acquired Brain Injury, Natalie Gilmore et al. 2022.
